## 1. Manual Information

This Bluetooth Connection Manual provides information on the connection of Bluetooth-enabled devices with the printer.

We at BIXOLON maintain ongoing efforts to enhance and upgrade the functions and quality of all our products. In following, product specifications and/or user manual content may be changed without prior notice.

## 2. Precautions

2-1 To connect the printer with another device via Bluetooth, the devices must be within 80m of one another. The connection is broken if the distance between devices exceeds 80m.

2-2 The maximum separating distance may be shortened if transmission obstacles, such as cement walls, are present.

2-3 If a device (such as a microwave oven, wireless LAN, etc.) that uses the same frequency is present, transmission may be interrupted.  
Separate the printer and Bluetooth-enabled device from such interrupting devices by a distance of at least 5m.

### 3. Bluetooth Connection Instructions

#### 3-1 iOS mode enable

1) Select the  icon.

2) Select "Bluetooth".

3) Select the printer to connect.

4) Enter "PIN" (Default: 0000).

# POS Printer

5) Select "Pair"

The screenshot shows an 'Enter PIN' dialog box. At the top, it says 'Enter PIN'. Below that, there are three buttons: 'Cancel' on the left, 'BLUETOOTH PRINTER' in the center, and 'Pair' on the right. The 'Pair' button is highlighted with a red box. Below the buttons, there is a text field labeled 'PIN' containing four dots and the number '0'. Below the text field is a large empty rectangular area. At the bottom of the dialog is a numeric keypad with buttons for digits 1-9, 0, and a backspace key.

6) Bluetooth communication is available.

The screenshot shows the 'Bluetooth' settings page on an iPhone. At the top, there is a back arrow and the word 'Settings', followed by the title 'Bluetooth'. Below the title, there is a toggle switch for 'Bluetooth' which is turned on. Underneath, it says 'Now discoverable as "Steve's iPhone"'. Below that is the section 'MY DEVICES'. In this section, there is one device listed: 'BLUETOOTH PRINTER' with the status 'Connected' and an information icon (i) to its right. This entire device entry is highlighted with a red box. Below 'MY DEVICES' is the section 'OTHER DEVICES' with a loading spinner icon. At the bottom, there is a note: 'To pair an Apple Watch with your iPhone, go to the Watch app.'

**3-2 Android mode**

1) Select the  icon.

2) Select "Bluetooth".

3) Select the printer to connect.

4) Enter "PIN" (Default: 0000).

5) Select "OK".

6) Bluetooth communication is available.

## 4. Troubleshooting

4-1 Please follow the guide below if Bluetooth is not searched on iOS device.

1) Check whether printer is connected to other iOS device. Printer is not able to be found on your iOS device if it is connected to other iOS device. You need to disconnect the connection to other iOS device, or turn on the printer again while the paper cover is opened.

\* *Printer is automatically connected to last iOS device which was connected. But it does not make a connection to any device, if user turns it on while the paper cover of it is opened.*
