

SAM4S

SAM4S ER-230EJ Electronic Cash Register

Operating and Programming Manual

All specifications are subject to change without notice.

ATTENTION

The product that you have purchased contains a rechargeable Lithium battery. This battery is recyclable. At the end of its useful life, under various state and local laws, it may be illegal to dispose of the battery into the municipal waste system. Check with your local solid waste officials for details concerning recycling options or proper disposal.

WARNING

This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

NOTE

The socket outlet shall be installed near the equipment and shall be easily accessible.

Precaution Statements

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

1-1 Safety Precautions

1. Be sure that all built-in protective devices are replaced. Restore any missing protective shields.
2. When reinstalling the chassis and its assemblies, be sure to restore all protective devices, including nonmetallic control knobs and compartment covers.
3. Make sure there are no cabinet openings through which people - particularly children - might insert fingers and contact dangerous voltages. Such openings include excessively wide cabinet ventilation slots and improperly fitted covers and drawers.
4. **Design Alteration Warning:**
Never alter or add to the mechanical or electrical design of the ECR. Unauthorized alterations might create a safety hazard. Also, any design changes or additions will void the manufacturer's warranty.
5. Components, parts and wiring that appear to have overheated or that are otherwise damaged should be replaced with parts that meet the original specifications. Always determine the cause of damage or over- heating, and correct any potential hazards.
6. Observe the original lead dress, especially near the following areas: sharp edges, and especially the AC and high voltage supplies. Always inspect for pinched, out-of-place, or frayed wiring. Do not change the spacing between components and the printed circuit board. Check the AC power cord for damage. Make sure that leads and components do not touch thermally hot parts.
7. **Product Safety Notice:**
Some electrical and mechanical parts have special safety-related characteristics that might not be obvious from visual inspection. These safety features and the protection they give might be lost if the replacement component differs from the original - even if the replacement is rated for higher voltage, wattage, etc.
Components that are critical for safety are indicated in the circuit diagram by shading, () or (). Use replacement components that have the same ratings, especially for flame resistance and dielectric strength specifications. A replacement part that does not have the same safety characteristics as the original might create shock, fire or other hazards.

CAUTION

Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose used batteries according to the manufacturer's instructions.

ATTENTION

Il y a danger d'explosion s'il y a remplacement incorrect de la batterie. Remplacer uniquement avec une batterie du même type ou d'un type équivalent recommandé par le constructeur. Mettre au rebut les batteries usagées conformément aux instructions du fabricant.

1-2 Servicing Precautions

WARNING: First read the-Safety Precautions-section of this manual. If some unforeseen circumstance creates a conflict between the servicing and safety precautions, always follow the safety precautions.

WARNING: An electrolytic capacitor installed with the wrong polarity might explode.

1. Servicing precautions are printed on the cabinet. Follow them.
2. Always unplug the units AC power cord from the AC power source before attempting to:
 - (a) Remove or reinstall any component or assembly
 - (b) Disconnect an electrical plug or connector
 - (c) Connect a test component in parallel with an electrolytic capacitor
3. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
4. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the portion around the serviced part has not been damaged.
5. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels and input terminals).
6. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500V) to the blades of AC plug. The insulation resistances between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
7. Never defeat any of the B+ voltage interlocks. Do not apply AC power to the unit (or any of its assemblies) unless all solid-state heat sinks are correctly installed.
8. Always connect an instrument's ground lead to the instrument chassis ground before connecting the positive lead ; always remove the instrument's ground lead last.

1-3 Precautions for Electrostatically Sensitive Devices (ESDs)

1. Some semiconductor (solid state) devices are easily damaged by static electricity. Such components are called Electrostatically Sensitive Devices (ESDs); examples include integrated circuits and some field-effect transistors. The following techniques will reduce the occurrence of component damage caused by static electricity.
2. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. (Be sure to remove it prior to applying power - this is an electric shock precaution.)
3. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of electrostatic charge.
4. Do not use freon-propelled chemicals. These can generate electrical charges that damage ESDs.
5. Use only a grounded-tip soldering iron when soldering or unsoldering ESDs.
6. Use only an anti-static solder removal device. Many solder removal devices are not rated as anti-static; these can accumulate sufficient electrical charge to damage ESDs.
7. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
8. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.
9. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together or lifting a foot from a carpeted floor can generate enough static electricity to damage an ESD.

Introduction

About the ER-230EJ

Congratulations! You have selected a very flexible electronic cash register designed for years of reliable service. ER-230EJ will fit many shops, providing fast transaction processing, security, and detailed sales information.

The ER-230EJ features a unique operator screen that allows you to view itemized transaction information, as well as providing on screen programming that is simple and easy to use. This manual includes in instructions for all models. The keyboard and printer configuration defines the model. All other features are the same, unless otherwise noted.

Using This Manual

This manual provides you with a means to use your SAM4S cash register to its fullest potential. It is divided into seven sections:

1. "*Getting Started*" on page 23 provides quick start steps to help you get up and running for basic applications.
2. "*Operations*" on page 25 guides you through basic operation sequences.
3. "*Manager Mode (X Mode)*" on page 61 explains manager controlled functions, along with X reports and balancing information.
4. "*Z Mode*" on page 71 explains how to reset register reports as well as other functions performed in this mode: mix & match discounts, PLU lookups and DataTran operations.
5. "*Service Mode*" on page 75 provides instructions for secure programming – usually done by the installing dealer prior to installation.
6. "*Program Mode*" on page 101 provides complete programming instructions, including PLU, function key programs, and options. This section is recommended for use by storeowners and managers. Call your SAM4S dealer if you find you need programming assistance.
7. "*Sample Reports*" on page 157 provides a sample of each register report.

The SAM4S ER-230EJ allows many different user applications. This manual was written with this in mind. Although we have tried to touch on all available options, your specific application may differ.

If you have questions concerning the configuration of your ER-230EJ, please contact your authorized SAM4S dealer.

Using Flowcharts

Flowcharts are used to supplement step-by-step instructions throughout this manual. For example, the following flowchart describes how to register £1.00 into the PLU1 key:

This flowchart means:

Press numeric key 1.

Press numeric key 0.

Press numeric key 0.

Press PLU #1.

Follow the flowchart from left to right, pressing the keys in the order they are shown. Numeric keypad entries are shown as square keys. PLU and function keys are shown as rectangular keys.

Identifying Components & Connections

Identifying Components

Inserting of External SD Card

- The SD slot is located in the printer compartment. Remove the printer cover.
- Remove the security screw to access the slot.
- Insert or Remove the SD card.

Connections

- The Serial port can be connected to PC, Scanner, Kitchen Printer and Pole display.
- The USB (Device and Host) port can be connected to PC, scanner or memory. If you want to know more details, See page on 96 for USB specification.

Programmable Features

- Memory Allocation System Supports:
 - ⇒ Over 6,000 Price Look Ups (PLUs) are available
 - ⇒ Up to 99 clerks with separate report totals
 - ⇒ Up to 99 PLU Group totals
 - ⇒ Up to 2 Price levels for each PLU
 - ⇒ Electronic Journal
- Up to 5 PLU modifier keys (i.e. small, medium, and large)
- 24 character programmable descriptors for PLUs and functions
- Four tax rates with value added tax (VAT) and ADD-ON capability.
- Programmable functionality for each key location
- 24-hour real-time clock with automatic day and date change
- Cheque, Cash, and up to 8 charge tender functions
- Currency conversion capability for up to 4 foreign currencies
- Training mode
- Programmable discount/surcharge/coupon keys
- Error Correct, Void, and Cancel Transaction functions
- Macro, Price Inquiry, Promo and Waste functions
- Management X and Z reports
- Electronic Journal capability
- 6-line programmable preamble and postamble messages
- Programmable descriptors for financial and clerk reports
- Up to 100 Mix & Match discounts

Display

The operator display of ER-230EJ comes with a 2 Line 16-character blue backlit LCD.

As items are registers, the item description will display on the first line; price and quantity information will display on the second line. Additional information and error messages will display as appropriate, and may be accompanied by an error tone.

REGISTER MODE

Note: The “CLOSED” message will display if a clerk is not signed on.

REGISTER MODE CLOSED

REGISTER MODE 0.00

VOID MODE

Note: The “CLOSED” message will display if a clerk is not signed on.

VOID MODE CLOSED

VOID MODE 0.00

MANAGER MODE (X)

MANAGER MODE CLOSED

- ◆ Press the **CASH** to display X mode.

X MODE 1. X REPORTS

- ◆ Press the ↑ key and the ↓ key to select menu and press the **CASH** key to confirm.

Z MODE

Z MODE 1. Z REPORTS

- ◆ Press the ↑ key and the ↓ key to select menu and press the **CASH** key to confirm.

PROGRAM MODE (P)

PROGRAM MODE 1 . PLU

- ◆ Press the ↑ key and ↓ key to select menu and press the **CASH** key to confirm.

SERVICE MODE (S)

SERVICE MODE 1 . SELF TEST

- ◆ Press the ↑ key and the ↓ key to select menu and press the **CASH** key to confirm.

Printer/Printers

If you want to know installing the paper, see the page on “24” for “Installing the Paper”.

Printer Specifications

Paper		58mm Thermal Paper (2 Inch)
Paper Loading:		Drop-in Loading
Paper Diameter:		50 Ø_max
Print Speed:	Normal	50mm/s
	Max	70mm/s
Paper end sensor		YES

Mode Key

Mode Select Method

The Mode key can be changed by either pressing the key until the indicator is shown under the correct mode on the display

- To select register press the MODE key until the display shows an indicator under REG

Fast Track Method

Uses the fast track method by entering the number of the mode required and press the mode key. i.e.

- To select Register Mode using the fast track method enter 3 for REG and press the MODE key

<u>NUMBER</u>	<u>MODE</u>
1	VOID MODE (VOID)
2	OFF MODE (OFF)
3	REGISTER MODE (R)
4	MANAGER MODE (X)
5	Z MODE (Z)
6	PROGRAM MODE (P)
7	SERVICE MODE (S)

Back-light On/Off

You can control the back-light with MODE key.

Turning on or off the back-light. It will be toggled.

Keyboards

Programmable key locations are shown with a bold outline.

ER-230EJ Keyboard Versions

FEED	QUICK HELP	CLEAR	PLU	X/TIME	#/NS	RA	PO	CLERK	MODE
RECEIPT ON/OFF	-	7	8	9	4	8	12	CHARGE1	CHARGE2 (↑)
ERROR CORR	+%	4	5	6	3	7	11	CONV1	CHEQUE (↓)
RETURN	-%	1	2	3	2	6	10	SUBTOTAL	
CANCEL	VOID	0	00	.	1	5	9	CASH	

Initial Clear

CAUTION: Do not share this information with unauthorized users. This procedure will not affect register programming, or clear previously stored totals in RAM memory.

The initial clear function allows you to exit any register activity and return to a beginning or cleared state. Any transaction that is in progress will be exited and totals for that transaction will not be updated.

Here are some reasons you may want to perform an initial clear:

- The register is in an unknown state, and you wish to exit the current program or transaction without following normal procedures.
- You have performed a function that includes a compulsory activity and you wish to bypass the compulsion.
- An initial clear may be necessary as part of servicing, or troubleshooting.

Perform this procedure only as necessary. Contact your SAM4S dealer first if you have questions about operating or programming your SAM4S ER-230EJ.

To Perform an Initial Clear:

1. Turn the power switch located on the right side of the register to the **OFF** position.
2. Press and hold the key position where the **SUBTOTAL** key is located on the default keyboard layout.
3. While continuing to hold the **SUBTOTAL** key, turn the power switch to the **ON** position. When the "INITIAL CLEAR" message displays release the **SUBTOTAL** key.

```
INITIAL CLEAR  
ENTER CASH KEY
```

4. Press the **CASH** key.

```
ARE YOU SURE?  
Y=CASH N=CLEAR
```

5. Press the **CASH** key. The message "INITIAL CLEAR OK!" prints when the initial clear is complete. To resume operations, you will need to sign on a clerk.

Getting Started

Quick Start Steps

SAM4S ECRs are designed to work out-of-the-box. You can sign on a clerk, enter amounts and finalize a sale. Most functions are active and ready to use.

Use the Quick Start Instructions provided here to prepare your ER-230EJ ECR for entering a program. Because the ER-230EJ features on-screen programming, the dealer or user can simply follow the menus presented when the mode is moved to the **PROGRAM MODE**. Detailed programming steps and reference information is found in the Program section of this manual.

Steps In this chapter:

1. Unpacking
2. Installing the Paper
3. Clearing All Memory

Unpacking

1. Unpack and unwrap the cash register.
2. Locate in the packing the following items:
 - Paper roll(s)
3. Plug the register into a grounded outlet, turn the power switch on.

Installing the Paper

Installing the paper

1. Remove the printer cover.
2. Lift up to open the paper cover.
3. Ensure that the paper is being fed from the bottom of the roll and then close the paper cover slowly until it locks firmly.
4. Pass the leading edge of the paper through the tear-bar slot. Tear off the excess paper. Replace the printer cover.

Clearing Memory

Before you use your ER-230EJ ECR for the first time, you **must** perform a memory all clear to insure that all totals and counters are cleared and that the default program is installed.

CAUTION: The procedures described in this area are security sensitive. Clearing the ER-230EJ memory after the register is put into service will erase all programming as well as totals and counters. Do not share this information with unauthorized users and distribute the “SERVICE MODE” only to those you may want to perform these functions.

1. Move to the **SERVICE MODE**.
2. Turn the power switch located on the right side of the register to the **OFF** position.
3. Press and hold the key position where the **CHEQUE** key is located on the default keyboard layout.
4. Continue to hold the appropriate key while turning the power switch to the **ON** position. The message “**RAM ALL CLEAR**” displays.
5. Press the upper left key of the keyboard, then the lower left key, then the upper right key, and finally press the lower right key.

6. The **SERVICE MODE** menu displays. The RAM Clear procedure is complete and the receipt prints.
7. If you want to allocate memory by default value, Press **CASH** key only.

```
LOAD DEFAULT SET
N=X/TIME  Y=CASH
```

Or follow the On-screen prompts.

```
PLU #           1000
```

8. If you want to finish memory allocation, press **CASH** key until LCD display “ARE YOU SURE?” message. And if you want to allocate memory area again, press **CLEAR** key. Repeat the allocation sequence.

DEFAULT Memory allocation Specifications

ALLOCATION ITEM	DEFAULT	MAX
PLU	1000	6000
CLERK	10	99
GROUP	10	99
PRICE LEVEL	1	2
MIX AND MATCH	20	100
EJ LINE	1000	15000

Operations

Introduction

ER-230EJ is designed for easy sale operation. You just need to select numbers and PLUs for sales operation without any unnecessary work. You can also operate easier by using Program Mode.

Overview

The following procedures are done from the Register Mode menu:

- ◆ Clerk Operations
- ◆ Item Registrations
- ◆ Shifting or Exempting Tax
- ◆ Percent Key Operations
- ◆ Return Merchandise Registrations
- ◆ Voids and Corrections
- ◆ No Sale Operations
- ◆ Received On Account Operations
- ◆ Paid Out Operations
- ◆ Subtotaling a Sale
- ◆ Totaling and Tendering
- ◆ Not Found PLU

Function key Descriptions

Keys are listed in alphabetical order. Many of the keys described below are not included on the default keyboard. See “Function key Assignment” on page 79 to add or change programmable keys.

Function key	Description
#/NS	Use as a non-add key to print a numeric entry (up to 8-digits) on the receipt and journal. This entry will not add to any sales totals. The #/NS key is also used to open the cash drawer without making a sale.
X/TIME	Use to multiply a quantity of items or calculate split pricing on PLU entries.
00, 0-9, DECIMAL	Use to make numeric entries in REG , X , Z , VOID , or P positions. The decimal key is used for decimal or scale multiplication, when setting or entering fractional percentage discounts, or when programming fractional tax rates. Do not use the decimal key when making amount entries into PLUs.
ADD CHECK	Use to combine individual trays (such as in a cafeteria situation). Each tray subtotal can advance the consecutive number, depending on programming.
CANCEL	Cancels a transaction without updating PLU, or function key totals. The Cancel function may only be used prior to tendering. Once tendering begins, the Cancel function may no longer be used. The CANCEL key corrects the appropriate totals and counters and the Financial report records total of transactions canceled.
CASH	Use to finalize cash sales. Calculates the sale total including tax and opens the cash drawer. Change computation is allowed by entering an amount before pressing the CASH key. The cash drawer will open only if the amount tendered is equal to or greater than the total amount of the sale. Post tendering is also available should a second change calculation be necessary. Re-enter the tendered amount and press the CASH key to show the new change computation. Press the CASH key a second time to issue a buffered receipt when the receipt on/off function is OFF.
CHEQUE	Use to finalize cheque sales. Calculates the sale total including tax, finalizes the sale, and opens the cash drawer. Change computation is allowed by entering an amount before pressing the CHEQUE key. The cash drawer will open only if the amount tendered is equal to or greater than the total amount of the sale. Change issued will be subtracted from the cash-in-drawer total.
CLEAR	Use to clear entries made into the 10 key numeric pad or X/TIME key before they are printed. Also used to clear error conditions.

CHARGE (1-8)	Use to finalize charge sales. Calculates the sale total including tax, finalizes the sale, and opens the cash drawer. Change computation is allowed by entering an amount before pressing the CHARGE key. The cash drawer will open only if the amount tendered is equal to or greater than the total amount of the sale. Change issued will be subtracted from the cash-in-drawer total.
CLERK	The register will not operate in register mode unless a clerk has been signed on. Direct or secret code sign on procedures accomplishes clerk sign-on. All entries made on the register will report to one of the 10 clerk totals. When a clerk is signed on, all entries following will add to that clerk's total until another clerk is signed on. To sign a clerk off, enter 0 (zero) and then press the CLERK key. The "CLOSED" message displays. The register cannot be operated until another clerk is signed on. The current clerk must first be signed off before another clerk may be signed on.
CONV (1-4)	The currency conversion function, allowed after subtotal, converts and displays the new subtotal at a preprogrammed exchange rate. Tendering is allowed after using the currency conversion function. Change is calculated and issued in home currency. The amount of foreign currency tendered is stored in a separate total on the Financial report, but not added to the drawer total.
ERROR CORR	Use to correct the last entry. The ERROR CORR key corrects the appropriate totals and counters.
LEVEL (1-2)	Price Level keys shift the price PLU that is being registered. Levels can be stay down; pop-up after each item to register, for example large, medium or small soft drink; pop-up after each transaction to register, for example, toppings of various pizza sizes.
MACRO (1-10)	Macro keys may be programmed to record, and then later perform, up to 50 keystrokes. For example, a macro key could be set to tender (preset tender) a common currency, such as £5 into the CASH key.
RETURN	Used to return or refund merchandise. Returning an item will also return any tax that may have been applied.
RECEIPT ON/OFF	When 'OFF' no receipt will print during a sale. (If the receipt is off, a buffered receipt is available by pressing the CASH key a second time.)
MODIFIER (1-5)	A modifier key alters the next PLU registered, either by changing the code number of the PLU so that a different item is registered, or by adding the modifier descriptor (and not changing the code of the subsequent PLU.)
PAID OUT (1-3)	Use to record money taken from the register to pay invoices, etc. The paid out amount subtracts from the cash-in-drawer total. Paid outs are allowed outside of a sale only.
%1 - %5	Up to five % keys may be placed on the keyboard. Each % key is set with a specific function, such as item discount or surcharge, or sale discount or surcharge. The percent rate may be entered or preprogrammed, or the percent keys can be programmed with a negative open or preset price, thus acting as coupon keys.

PLU	The PLU key is used to register price lookups by number entry. PLUs can be programmed open or preset, and positive or negative.
PRICE CHANGE	Use to change the price of a PLU in register mode.
PRICE INQUIRY	Use to display the price of a PLU without registering the price.
PROMO	The PROMO key allows you to account for promotional items, as in "buy two, get one free". Pressing this key will remove an item's cost from the sale, but will include the sale of the item in the item's sales counter.
FEED	Advances the receipt paper one line, or continuously until the key is released.
RECD ACCT (1-3)	The RA (received on account) key is used to record media loaned to the cash drawer, or payments received outside of a sale. The cash drawer will open. The amount received adds to the cash-in-drawer total.
SUBTOTAL	Displays subtotal of sale including tax. Must be pressed prior to a sale discount or sale surcharge.
TAX EXEMPT	Press the TAX EXEMPT key to exempt tax 1, tax 2, tax 3, and/or tax 4 from the entire sale.
TAX SHIFT (1-4)	When pressed before a PLU entry, the tax shift keys reverse the tax status of the PLU, i.e., a PLU with non-tax status would become taxable or a PLU with tax status would become non-taxable.
VOID	Use to correct an item entered earlier within a sale. The VOID key corrects the appropriate totals and counters. To correct the last item, use the ERROR CORR key. For void operations outside of a sale (Transaction Void), use the VOID MODE . The Financial report records totals for each type of void separately.
WASTE	Allows control of inventory by accounting for items that must be removed from stock due to spoilage, breakage or mistakes. Press the WASTE key before entering wasted items, and then press the WASTE key again to finalize. The WASTE key may be under manager control, requiring the mode to be in the MANAGER MODE. The WASTE key is not allowed within a sale.

Clerk Operations

The number of clerks available is determined by memory allocation. (The default configuration provides 10 clerks.) See "ALLOCATION" in the "Service Mode" chapter to set the number of clerks as well as other memory variables.

You can choose a direct sign-on or code entry clerk system:

- You can provide maximum security in a multiple clerk system with the code entry system. Enter the clerk secret code, and then press the **CLERK** key to sign on the register.
- You can sign off a clerk by entering **0**, then pressing the **CLERK** key.

You can also select stay down or pop-up mode for clerk operation:

- Stay down means that once a clerk is signed on, the same clerk will remain signed on until the clerk signs off. A stay down clerk system might be used when only one operator uses the register at a time and a different operator begins when a work shift is changed.
- Pop-up means that the clerk is automatically signed off at the end of each transaction. To begin a transaction, you must first sign a clerk on. A pop-up clerk system might be used in a department store, where several clerks use the register during the same shift and clerk sales information is required.

See "SYSTEM" of "Options Programming" in the "Program Mode" chapter to set clerk options.

Clerk Sign On Instructions

When a clerk is not signed on, the message "CLOSED" is shown on the display. Note that the current clerk must be signed off before a new clerk can be signed on.

Direct Sign-on

Code Entry

Clerk Sign Off Instructions

Item Registrations

All registrations are accumulated into PLUs. Keyboard PLUs are fixed keys on the keyboard (like traditional department keys) that access specific PLUs.

- Traditional code-entry PLUs can also be registered by entering the PLU number and pressing the PLU key.
- If optional scanning is implemented, the PLU number corresponds to the UPC number and a PLU is registered when an item is scanned.

As you make item registrations, you can follow your entries by viewing the display. Remember that the sale and tax totals are updated automatically with each entry.

Keyboard PLU Entries

As you make PLU registrations, you can follow your entries by viewing the display.

In the following examples:

- PLU1 is programmed with a preset price of £1.99, and is taxable by Tax 1.
- PLU2 is programmed for open entries.
- PLU3 is programmed with a preset price of £2.99, and is taxable by Tax 1.
- PLU5 is programmed with a preset price of £1.29, and is taxable by Tax 1.
- PLU6 is programmed with a single item of £6.00.
- Tax 1 is programmed at 6%.

Open Keyboard PLU Entry

1. Enter an amount on the ten-key pad.
Do not use the decimal key. For example, for £2.99, enter:

2. Press a PLU key. For example, press PLU 1:

THANK-YOU		
CALL AGAIN		
23/11/2015 MON		08:33
PLU1 T1		£2.99
TAX1		£0.18
TOTAL		£3.17
CASH		£3.17
CLERK 01	000011	00001

Preset Price Keyboard PLU

A preset PLU registers the price that was previously programmed for the PLU. See "*PLU Programming*" in the "*Program Mode*" chapter to program preset prices.

1. Press a preset PLU key. For example, press PLU 5:

THANK-YOU		
CALL AGAIN		
23/11/2015 MON		08:33
PLU5		£1.29
TOTAL		£1.29
CASH		£1.29
CLERK 01	000011	00001

Keyboard PLU Repeat Entry

Open or preset price PLUs can be repeated as many times as necessary by pressing the same PLU again. The number of times the item is repeated is shown on the display.

1. Enter an amount on the ten-key pad.
Do not use the decimal key. For example, for £2.99, enter:

2. Press a PLU key. For example, press PLU 1:

3. To register a second item exactly as the first, press the PLU key a second time. For example, press PLU 1:

THANK-YOU		
CALL AGAIN		
23/11/2015 MON		08:33
PLU1 T1		£2.99
PLU1 T1		£2.99
TAX1		£0.36
TOTAL		£6.34
CASH		£6.34
SUNNY	000011	00001

Keyboard PLU Multiplication

When several of the same items are to be entered into the same PLU, you can use multiplication. You can enter a quantity (1 to 999.999) using the **X/TIME** key. You can multiply open or preset PLUs.

1. Enter the quantity of items being purchased; press the **X/TIME** key.
For example, enter 4 on the numeric key pad and press the **X/TIME** key:

2. Enter an amount on the ten-key pad.
Do not use the decimal key. For example, for £1.99, enter:

3. Press a PLU key. For example, press PLU 1:

THANK-YOU		
CALL AGAIN		
23/11/2015 MON		08:33
4X	@1.99	
PLU1 T1		£7.96
TAX1		£0.48
TOTAL		£8.44
CASH		£8.44
SUNNY	000011	00001

Keyboard PLU Multiplication with Decimal Point

If you are selling items by weight, or if you are selling yard goods, you can multiply a fraction of a unit.

1. Enter the amount with the decimal point; press the **X/TIME** key. For example, for 3.75 pounds of produce, enter:

3 . 7 5 X/TIME

2. Enter an amount on the ten-key pad. *Do not use the decimal key.* For example, if the price is £0.99 per pound, enter:

9 9

3. Press a PLU key. For example, press **PLU 1**:

1

THANK-YOU CALL AGAIN		
23/11/2015 MON		08:33
3.75X	@0.99	
PLU1 T1		£3.71
TAX1		£0.22
TOTAL		£3.93
CASH		£3.93
CLERK 01	000011	00001

Split Pricing (Keyboard PLU)

When items are priced in groups, i.e. 3 for £1.00, you can enter the quantity purchased and let the register calculate the correct price.

1. Enter the quantity purchased; press the **X/TIME** key. For example, enter:

2 X/TIME

2. Enter the quantity of the group price; press the **X/TIME** key. For example, if the items are priced 3 for £1.00, enter:

3 X/TIME

3. Enter an amount on the ten-key pad. For example, if the items are priced 3 for £1.00, enter:

1 0 0

4. Press a PLU key. For example, press **PLU 1**:

1

THANK-YOU CALL AGAIN		
23/11/2015 MON		08:33
2@3FOR	@1.00	
PLU1 T1		£0.67
TAX1		£0.04
TOTAL		£0.71
CASH		£0.71
CLERK 01	000011	00001

Single Item Keyboard PLU

Single item PLUs automatically total as a cash sale immediately after registration. Use single item PLUs for speedy one item sales. For example if you are selling admission tickets, and all ticket sales are one item sales, you can use an open or preset PLU. After each registration, the drawer will immediately open, and a separate transaction receipt is printed. See "*PLU Programming*" in the "*Program Mode*" chapter to program a single item PLU.

1. Press a single item preset PLU key (or enter a price and press a single item open PLU key.) For example, press **PLU 6**:

THANK-YOU		
CALL AGAIN		
23/11/2015 MON	08:33	
PLU6	£1.29	
TOTAL	£1.29	
CASH	£1.29	
CLERK 01	000011	00001

Open Code Entry PLU

If the PRESET status of a PLU is set to N (no), the PLU will operate as an open PLU. See "*PLU Programming*" in the "*Program Mode*" chapter to program PLU descriptors and options.

1. Enter the PLU number; press the PLU key. For example, enter:

2. The display will prompt "ENTER PRICE". Enter an amount on the ten-key pad. *Do not use the decimal key.* For example, for £2.99, enter:

3. Press the **PLU** key again.

THANK-YOU		
CALL AGAIN		
23/11/2015 MON	08:33	
PLU2 T1	£2.99	
TAX1	£0.18	
TOTAL	£3.17

TOTAL		£2.11
CASH		£2.11
CLERK 01	000011	00001

PLU Price Inquiry

You can check the price of a PLU without registering the PLU by placing a price inquiry function key on the keyboard.

1. Press the **PRICE INQ** key. The message "PRICEINQ" displays:

2. Press a preset PLU key, or enter a PLU number and press the PLU key:

3. The PLU descriptor and price display on the screen. If the PLU has prices at more than one price level, all prices will be shown.
4. Press **CLEAR** to remove the price information from the screen, or enter the PLU again to register the item.

SCREEN EXAMPLE

HAMBURGER
1 : 1.25

Modifier Key

Pressing a modifier key alters the next PLU registered, either by changing the code number of the PLU so that a different item is registered, or by just adding the modifier descriptor and registering the same PLU. See "MODIFIER 1-5" in the "Program Mode" chapter in order to determine how the modifier key will affect the PLU entry.

Modifiers can be:

- *stay down* so that registrations will be modified by the same modifier until another modifier is selected,
- *pop-up after each item* to register, for example large, medium or small soft drink, or
- *pop-up after each transaction* to register the same modification for the item until the transaction is finalized.

See "SYSTEM" of "Options Programming" in the "Program Mode" chapter to select stay down/pop-up status.

Pop-Up Modifier Key Affecting PLU Code

1. Press a preset PLU key. For example, press PLU 1 with a price of £1.00.

2. Press the **MOD 1** key. The message "MOD1" displays.

3. Press the same PLU key. In this example the modifier 1 will add the digit 1 to the fourth PLU # position, resulting in the registration of PLU #1001.

4. Press another PLU key. In this example press PLU 2 with a price of £1.50.

TOTAL		£3.75
CASH		£3.75
CLERK 01	000011	00001

Price Level Key

If you choose to use the price level feature, you must allocate memory for each level. See "ALLOCATION" in the "Service Mode" chapter. Note that the default program selects one price level. You must also place price level keys on the keyboard. See "Function key assignment" in the "Service Mode" chapter.

If you use this feature, the same PLU can be given up to 2 different preset prices. Price Level keys shift the price that is being registered. Levels can be:

- *stay down* so that registrations will stay in the selected level until another level is selected,
- *pop-up after each item* to register, for example large, medium or small soft drink,
- *pop-up after each transaction* to register the same level until the transaction is finalized.

See "SYSTEM" of "Options Programming" in the "Program Mode" chapter to set how the price level keys operate.

Pop-Up Price Level Keys

1. Press a preset PLU key. For example, press PLU 1 programmed with a price of £1.00 for price level 1.

2. Press the **LEVEL 2** key. The message "LEVEL 2" displays.

3. Press the same PLU key. In this example the PLU 1 key is programmed with a price of £2.00 for price level 2.

4. Press another PLU key. In this example press PLU 2 programmed to register PLU #2 with price level 1. Note that the level 1 price is registered.

Shifting or Exempting Tax

Shifting Tax

PLUs can be programmed to automatically add the appropriate tax or taxes. Occasionally, you may need to sell a normally taxable item without tax, or a normally non-taxable item with tax. You can perform this tax shifting with one of the four tax shift keys.

1. Press the tax shift for the tax you wish to shift. For example, Press **TAX SHIFT 1**:

**TAX 1
SHIFT**

2. Enter an amount on the ten-key pad.
Do not use the decimal key. For example, for £2.99, enter:

2 9 9

3. Press a PLU key. For example, press **PLU 1**. If **PLU 1** is normally taxable by tax 1, the registration will be non-taxable.

1

CLERK 01	000011 00001

Exempting Tax

Occasionally, you may need to exempt tax from an entire sale. For example, you might remove all state and local taxes when you sell merchandise to a church or charitable institution.

You can exempt tax by using the tax shift keys and the **SUBTOTAL** key, or you can use the **TAX EXMT** (tax exempt) function key.

Exempting Tax with Tax Shift Keys

1. Enter an amount on the ten-key pad.
Do not use the decimal key. For example, for £2.99, enter:

2. Press a taxable PLU key. For example, press **PLU 1**:

3. Press **SUBTOTAL**:

4. Press the tax shift key (or keys) that represents the tax you wish to shift. For example, to exempt tax 1 press **TAX SHIFT 1**, then press **SUBTOTAL**:

5. The display reflects the transaction without added taxes. Total the sale with **CASH**, **CHEQUE**, or a **CHARGE** function. The sale will not include tax 1.

Percent Key Operations

A total of five % functions are available. (%1) is located on the default keyboard of the ER-230EJ. Each function is individually programmable to add or subtract, from an individual item or from a sale total, amounts (coupons) or percentages. You can also program the percentage key taxable or non-taxable, so that sales taxes are calculated on the net, or the gross amount of the item or sale. You can also program preset prices or percentages.

The operation examples in this section show the percentage key in a variety of configurations. See "*Function Key Programming*" in the "*Program Mode*" chapter to assign a specific function to each percentage key.

Preset Percent Discount on an Item

In this example the %1 function is preset with a rate of 10 %.

1. Register the item.
2. Press the %1 key:

3. The discount is automatically subtracted.

THANK-YOU		
CALL AGAIN

Coupon on Sale (Vendor Coupon)

When programmed as "amount", "sale", "open" and "negative", a % key will perform a coupon against a sale (or vendor coupon.) Also, depending upon programming:

- You may be allowed to enter only one coupon in a sale, after the **SUBTOTAL** key is pressed,
- You may be allowed to enter multiple coupons, but you must press the **SUBTOTAL** key before each coupon entry, or
- You may be allowed to enter multiple coupons, without first pressing **SUBTOTAL**.

In this example, a coupon may be entered only once, and you must first press **SUBTOTAL**.

1. Register the items you wish to sell.
2. Press the **SUBTOTAL** key:

SUBTOTAL

3. Enter the amount of the coupon, press the appropriate % key. For example:

2 0 0 %1

4. The coupon is subtracted.

Non Add Number

You can also use the **#/NO SALE** key to print any number (up to 9 digits) on the printer paper. You can enter the number any time during a transaction. For example, if you wish to record a checking account number, enter the number and press the **#/NO SALE** key before totaling the sale with the **CHEQUE** key.

1. Register the items you wish to sell.
2. Enter the number you wish to record, for example enter:

3. Press **#/NS**:

4. Press **CHEQUE**:

```

Received On Account Operations

You can use one of the received on account functions (**RA1-RA3**) to accept cash or cheques into the cash drawer when you are not actually selling merchandise. For example, use received on account to accept payments for previously sold merchandise or record loans to the cash drawer.

1. Press one of the received on account keys (**RA1-RA3**).

RA1

2. Enter the amount of cash received, press **CASH**.

1 0 0 0 CASH

3. Enter the cheque amount received, press **CHEQUE**.

1 0 0 0 CHEQUE

4. Enter the charge amount received, press **CHARGE**.

1 0 0 0 CHARGE
1

5. You can continue to itemize receipts, or you can finalize by pressing or selecting the same received on account key.

Subtotaling a Sale

1. Register the items you wish to sell.
2. Press **SUBTOTAL**. The subtotal will display with the message "SUBTOTAL" indicated on the rear display.

The subtotal can be printed if the print option is set. See "PRINT" of *Options Programming* in the *Program Mode* chapter.

Totaling and Tendering

There are ten tender functions available to categorize sales. **CASH** and **CHEQUE** are individual keys on the keyboard.

Depending upon how your register is programmed you might find charge keys as individual function keys on the keyboard.

Totaling a Cash Sale

1. Register the items you wish to sell.
2. To total a cash sale, press **CASH**:

CASH

3. The display will indicate the total amount of the cash sale.

THANK-YOU

Totaling a Charge Sale

Use the charge keys to track charge or credit card sales. See "Function Key Programming" in the "Program Mode " chapter to change the descriptors for the charge tender functions. For example, you can use CHARGE 1 to track Visa card sales. The descriptor "VISA" will display on the screen and print on the printer. You can also set tendering options for the charge keys, i.e. whether to allow over tendering or to enforce tendering.

1. Register the items you wish to sell.
2. Press one of the charge key if it is located on the keyboard:

CHARGE1

THANK-YOU CALL AGAIN

Split Tender

Split tendering is paying for one transaction by more than one payment method. For example, a £20.00 sale could be split so £10.00 is paid in cash, and the remaining £10.00 is paid by a cheque. If necessary, you can make several different payments.

Note: By default, CASH and/or CHEQUE under tenders are allowed. This can be changed through function key programming.

1. Register the items you wish to sell.
2. Enter the amount of cash tendered by the customer. For example, enter £10.00 and press **CASH**:

The display will indicate the £10.00 cash tender and the £10.00 total still due.

3. Enter the amount of cheque tendered by the customer. For example, enter £10.00 and press **CHEQUE**:

4. When the total tendered equals or exceeds the total due, the receipt will print and the transaction is complete.

Post Tender

Post tendering means computing change after the sale has been totaled and the drawer is open. This feature is useful when a customer changes the amount of the tender or when a "quick change artist" confuses a clerk. Normally, this function is not allowed. If you wish to allow post tendering, you must set the appropriate options program. See "SYSTEM" of "Options Programming" in the "Program Mode" chapter. (A separate system option determines whether the drawer opens on the post tender.)

1. Register the items you wish to sell.
2. Press **CASH**:

CASH

3. The display will indicate the total of the cash sale.
4. Enter the amount of the new tender, Press **CASH**:

2 0 0 0 **CASH**

5. The display will indicate the change due.

Receipt On/Off and Receipt on Request

When a receipt is not normally issued, you can turn the receipt function off. See "Receipt On/Off" in the "Manager Mode (X Mode)" chapter.

If the receipt is off, you can still issue a receipt after the sale has been completed.

Printing a Receipt after the Sale

After the sale has been totaled, but before the next transaction is started, press **CASH**:

CASH

Currency Conversion

If you normally accept currency from neighboring nations, you can program the ER-230EJ to convert the subtotal of a sale to the equivalent cost in the foreign currency. You can set up to four separate conversion functions for different foreign currencies. To do this, you need to program the conversion factor. For example, if the US dollar (home currency) is worth 1.3720 Canadian dollars (foreign currency), the conversion factor is 1.3720. See "Function Key Programming" in the "Program Mode" chapter to set a conversion factor.

1. Register the items you wish to sell.
2. Press the **CONV1** key if it is located on the keyboard:

3. The amount due in foreign currency is displayed.
4. Enter the amount of the foreign currency tender, Press **CASH**:

5. The display will indicate the amount of foreign currency tendered and display £5.17 change due. **The change due is computed in home currency!**

THANK-YOU

Not Found PLU

Note: The “SYSTEM” of "Options Programming" in the "Program Mode " chapter. “ENABLE NOT FOUND PLU” must be set to YES to allow this function.

The “Not Found PLU” feature is available for use when an optional scanner is used to input PLUs. If an item is scanned that is not programmed in the PLU file, the operator has the option to input the price of the item and assign it the same descriptor and properties of another PLU. This provides a simple mechanism for quickly building an item file for a simple scanning installation.

Quick Entry Method

1. Scan an item or input a PLU number. If the item is in the PLU file, it will register, if an item is not in the PLU file, the NOT FOUND PLU screen will display:

NOT FOUND PLU	0
---------------	---

2. Enter the PLU PRICE. Press PLU on the keyboard. The screen will be display:

PLU1	
1	100.00

Note: The not found PLU will assume the same attributes of the PLU selected here. For example, if the item scanned is a “liquor” item, then press another PLU in the liquor category, or if you are using a PLU designated to accept open liquor entries, that PLU must be set to be a preset PLU with a preset value of zero and preset override allowed. (If you copy the PLU to an open PLU, the not found PLU will also be an open PLU.).

Full Entry Method

3. Scan an item or input a PLU number. If the item is in the PLU file, it will register, if an item is not in the PLU file, the NOT FOUND PLU screen will display:

NOT FOUND PLU
ENTER CASH KEY

4. Press **CASH** key to creast PLU. The screen will be display:

NOT FOUND PLU
1.DESC: []

Not Found PLU List

Managers will typically use the “Not Found PLU list” as a tool to update the PLU file. A list of up to 50 not found PLU items can be retained in the list. When capacity is reached, you must RESET NOT FOUND PLU LIST.

- To run a NOT FOUND PLU list, choose X REPORTS → PLU → NOT FOUND PLU (selection #3) from the PLU REPORT menu
- To run a Reset Not Found PLUs, choose NOT FOUND PLU (selection #3) from the Z MODE menu.

Manager Mode (X Mode)

Introduction

All Management Functions take place with the **MANAGER MODE**. Some register operations may be programmed to require the **MANAGER MODE** in order to operate.

Overview

The following procedures are done from the Manager Mode(X mode) menu:

- ◆ Manager Mode / Report Mode
- ◆ X Reports
- ◆ Flash report
- ◆ Save Report to SD Card
- ◆ Declaration
- ◆ Set Training Mode
- ◆ Program Stock Entry
- ◆ Receipt On or Off

Manager Mode/Report Mode

Manager mode allowed only with manager control can be performed.

1. Move to the **MANAGER MODE** to display the **MANAGER MODE** screen:

MANAGER MODE 0.00

2. Press **CASH** to display the **REPORT MODE**.

X MODE 1. X REPORTS 2. DECLARATION 3. FLASH REPORT 4. SET TRAIN MODE 5. STOCK ENTRY 6. SAVE RPT SD 7. RCPT ON.OFF
--

X Reports

X reports read, but do not reset, totals and counters within a report.

1. Press **CASH** to display the X MODE.
2. From the **X MODE** screen press **1** and **CASH** to select X Reports:

```
      X REPORTS
1. FINANCIAL
```

3. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.

```
      X REPORTS
1. FINANCIAL
2. TIME
3. PLU
4. CLERK
5. GROUP
6. MIX & MATCH
7. STOCK
8. EJ
```

4. When a report is selected, the **FINANCIAL** screen displays:

```
      FINANCIAL
1. FINANCIAL
```

```
      FINANCIAL
1. FINANCIAL
2. DRAWER TOTALS
3. DAY
4. VOID
5. TRAIN FINANCIAL
```

5. Select the **REPORT LEVEL** (**DAILY** or **PERIOD**). After the selection, the report will start.

```
      FINANCIAL
1. DAILY (X1)
2. PERIOD (X2)
```

Electronic Journal Operation

An electronic journal feature is available on the ER-230EJ. The electronic journal captures the sales journal in the register memory. If you intend to use the electronic journal, you must allocate sufficient memory (see "ALLOCATION" in the "Service Mode " chapter) and activate the journal and set related journal capture options (see "EJ" of "Options Programming" in the "Program Mode " chapter.)

Use this program to print all or selected parts of the journal memory. Note: this program will not clear the electronic journal. See "RESET E.J" in the "Z MODE".

1. Press **CASH** to display the X MODE. Press **CASH** to X REPORTS. From the **X REPORTS** menu press **8** and **CASH** to display the electronic journal menu:

```
          EJ
1. ALL
```

2. Press the ↑ key and the ↓ key to select menu and press the **CASH** key to confirm.

```
          EJ
1. ALL
2. CASH
3. CHECK
4. CHARGE
5. PERCENT
6. RA/PO
7. RETURN
8. ERR CORR./VOID

10. CANCEL
11. NEGATIVE
12. RESET REPORT
13. VOID MODE
14. TRAINING
15. BY CLERK
16. BY DATE
17. BY RCPT NO.
18. BY LINE
```

Declaration

Cash declaration is the process of counting and reporting media in drawer before a report is taken. "Enforce cash declaration" is an option that requires to the operator to declare amounts of media in the drawer before a financial, clerk, or cash in drawer report can be generated. The purpose of this feature is to insure accurate reporting, even in case of an overage. You can enforce declaration by setting the appropriate options program. See "REPORT" of "Options Programming" in the "Program Mode " chapter.

1. Press **CASH** to display the X MODE.
2. From the **X MODE** menu press **2** and **CASH** to display the **DECLARATION SCREEN**. The cash drawer opens.

3. At the DECLARATION SCREEN, enter cash amounts, press the **CASH** key. Enter cheques individually, or enter a cheque total, press the **CHEQUE** key. You can make as many entries as you wish; the screen will keep running totals. You may wish to use the **X/TIME** key to multiply. For example if you are declaring 37 quarters, you can enter **37**, press **X/TIME**, enter **25**, and then press **CASH**. The result is added to the cash declared running total on the screen.
4. When you have completed declaration entries, press the **CASH** key again to finalize and total your declaration.

Flash Report

You can view flash report on screen.

1. Press **CASH** to display the X MODE.
2. From the **X MODE** menu press **3** and **CASH** to display the FLASH REPORT.
The cash drawer opens.

GROSS SALES	0.00
-------------	------

3. At the FLASH REPORT screen, press **↑** key to view previous page and **↓** key to view next page.

GROSS SALES	0.00
NET SALE	0.00
CASH-IN-D	0.00
CHEQUE-IN-D	0.00
CHG1-IN-D	0.00
CHG2-IN-D	0.00
CHG3-IN-D	0.00
CHG4-IN-D	0.00
CHG5-IN-D	0.00
CHG6-IN-D	0.00
CHG7-IN-D	0.00
CHG8-IN-D	0.00
FD/S-IN-D	0.00

Training Mode

A training mode is available so that the register can be operated (to practice registrations) without updating totals and counters. If you choose to use training mode, you must set a training mode password (see "TRAIN MODE" of the "Options Programming" in the "Program Mode" chapter.)

1. Press **CASH** to display the X MODE menu.
2. From the **X MODE** menu press **4** and **CASH** to enter or exit training mode:

SET TRAIN MODE
START:1 / END:0

3. The **START TRAIN** screen displays. To start training mode, type your password and press **CASH**.

Stock Entry

Note: Before program PLU stock, 'Inventory Item' option set as 'Y' in PLU programming.

1. Press **CASH** to display the **X MODE**.
2. From the **X MODE** menu, press **5** and **CASH** for stock entry.

```
STOCK ENTRY
1. PROGRAM
```

ONE PLU

3. To program stock, press **1** and **CASH** key.

```
PROGRAM
1. ONE
```

4. Select the PLU or PLUs you wish to program one of the following ways.
5. From the **PROGRAM** screen, press **1** and **CASH** to add an individual PLU. The **PLU NUMBER** screen display:

```
ENTER PLU #
0
```

RANGE PLU

3. From the **PROGRAM** screen, press **2** and **CASH** to display **RANGE PLU** screen.

```
ENTER FROM PLU #
0
```

4. Enter **FROM PLU#** number to display **TO PLU#** screen:

```
ENTER FROM PLU #
1
```

```
ENTER TO PLU#
2
```

5. Select operator **ADD**, **SUB** or **REPLACE**.

```
OPERATOR: ADD (+)
ADD (+) ←
```

6. Enter the stock quantity you wish to ADD/SUBTRACT/REPLACE, and press **CASH**. Note that stock is kept in decimal units and you must enter new or additional stock to two digits beyond the decimal. For example, type **1 0 0 0** to enter ten units of inventory.
7. To program a additional PLUs repeat step 3 or press CLEAR key to finalize.

Save Report SD

You can save Report file as csv format or rep format. Please refer to 'SD Card Operation' of Service Mode Programming.

Receipt On / Off

You can turn the register printer to an *on* or *off* condition. In the *off* condition transactions will not be printed, but reports will continue to print, if requested.

1. Press **CASH** to display the **X MODE**.
2. From the **X MODE** menu, press **7** and **CASH** for stock entry.

RCPT ON/OFF ON:0 / OFF:1

3. The **RCPT ON/OFF** screen displays. Press the **0** to print or the **1** to not print.

Note: When the receipt is off, a receipt may be printed after the sale by pressing CASH after the transaction is complete.

Z Mode

Z Mode

1. Move to the **Z MODE** to display the **Z MODE** menu:

```
Z MODE  
1. Z REPORT
```

```
Z MODE  
1. Z REPORT  
2. RESET E.J.  
3. NOT FOUND PLU

Z Reports

1. From the **Z MODE** menu press **1** and **CASH** to select Z Reports:

```
      Z REPORTS
1. FINANCIAL
```

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.

```
      Z REPORTS
1. FINANCIAL
2. TIME
3. PLU
4. CLERK
5. GROUP
6. MIX & MATCH
7. STOCK
```

3. When a report is selected, the **FINANCIAL** screen displays:

```
      FINANCIAL
1. FINANCIAL
```

```
      FINANCIAL
1. FINANCIAL
2. DAY
3. VOID
4. TRAIN FINANCIAL
```

4. Select the **REPORT LEVEL** (**DAILY** or **PERIOD**). After the selection, the report will start.

```
      FINANCIAL
1. DAILY (Z1)
2. PERIOD (Z2)
```

Reset Electronic Journal

An electronic journal feature is available on the ER-230EJ. The electronic journal captures the sales journal in the register memory. If you intend to use the electronic journal, you must allocate sufficient memory (see "ALLOCATION" " in the "Service Mode " chapter) and activate the journal and set related journal capture options (see "EJ" of "Options Programming" in the "Program Mode " chapter.)

Use this to clear the journal memory. The journal will not be printed. To read all or selected parts of the E.J., see "Electronic Journal Operation" in the "Manager Mode (X Mode)" chapter.

1. From the **Z MODE** menu press **2** and **CASH** to clear the electronic journal:

ARE YOU SURE? Y=CASH N=CLEAR

2. The screen asks: **ARE YOU SURE?** Press the **CASH** key for **YES** or **CLEAR** key for **NO** to clear the report.

Reset Not Found PLU

Not Found PLUs you can add is 50. If you add up to 50, Use this to clear the Not found PLUs.

1. From the **Z MODE** menu press **3** and **CASH** to clear the Not Found PLUs you added.

ARE YOU SURE? Y=CASH N=CLEAR

2. The screen asks: **ARE YOU SURE?** Press the **CASH** key for **YES** or **CLEAR** key for **NO** to clear the report.

Service Mode

Introduction

ER-230EJ provides back-up functions of all reports and PGMs. Moreover, you could initialize the memory **to factory default**. You need to register the setting with this Service Mode in case you connect ER-230EJ with external printer or Scanner. You could also register frequently-using Function Keys

Overview

The following procedures are done from the Service Mode menu:

- Self Tests
- Memory clear
- Memory Allocation
- Assignment of functions to keyboard locations
- Define port
- ECR Setup
- Program backup
- Help menu

Service Mode

1. Press **9 MODE** to select the **SERVICE MODE** to display the **SERVICE MODE** menu:

```
SERVICE MODE
1. SELF TEST
```

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.

```
SERVICE MODE
1. SELF TEST
2. MEMORY CLEAR
3. ALLOCATION
4. KEY ASSIGN
5. DEFINE PORT
6. ECR SETUP
7. PROGRAM BACKUP
8. HELP MENU
```

Self Test

Various components of the ER-230EJ are tested by using this program.

1. From **SERVICE MODE** menu press **1** and **CASH** to display the SELF TEST menu:

```
SELF TEST
1. BATCH TEST
2. PRINTER
3. DISPLAY
4. KEYBOARD
5. INTERFACE
6. RTC
7. BATTERY
```

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.
3. Press the digit representing the test you wish to perform.

Memory Clear

Before you use your ER-230EJ for the first time, you **must** perform a memory all clear to insure that all totals and counters are cleared and that the default program is installed. Go to “*Clearing Memory*” on page “25” to complete this procedure.

1. From **SERVICE MODE** menu press **2** and **CASH** to display the MEMORY CLEAR screen:

Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.

```
MEMORY CLEAR
1. CLEAR TOTAL
2. CLEAR GRAND
3. CLEAR PLU
4. CLEAR PRICE=0
5. EDIT COUNTERS
6. NON MOVER CLR
```

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.
3. To clear total, press **1** the **CASH**. The screen asks: **ARE YOU SURE?**

```
ARE YOU SURE?
Y=CASH N=CLEAR
```

4. Press the **CASH** for YES or the **CLEAR** for NO.
5. The message "ALL TOTAL CLEAR" is printed and the screen returns to the **SERVICE MODE** menu.

Clear Totals

This selection clears all totals and counters, including the grand total.

Clear Grand Total

This selection clears only the grand total.

Clear PLU File

This selection clears the entire PLU file, including totals, counters and programming.

Clear Price=0

This selection clears the entire PLUs programmed zero price.

Clear Non Mover

This selection clears the entire PLU file that have not sold, including totals, counters and programming.

Edit Counters

This selection edits some counters and totals: Z counter, Receipt No, Grand Total and Train Grand Total.

EDIT COUNTERS	
Z COUNTER	1
RECEIPT #	13
GRAND TOTAL	100.00
TRAIN GRAND TTL	0.00

Function Key Assignment

Any programmable key location may be reprogrammed with a function from the list of available functions on page 80 of this manual. The default program installs the functions as they are shown with the standard key legends.

To change the function on a specific key:

1. At the **SERVICE MODE**, press **4** and **CASH** for Key Assignment programming. The **KEY ASSIGNMENT** screen displays:
2. Enter a new key code from “*Function key codes*” on page “80” and press key location. Press the **SUBTOTAL** to print the key code table.
3. Press **CASH** to save the changes you have made and to return to **SERVICE MODE**.
4. The printer will print out a receipt showing all the changes made to the keyboard.

Notes:

1. Numeric keys (0-9), CLEAR, and CASH cannot be removed from the keyboard unless they have been assigned to a new keyboard location. This protects the programmer from accidentally removing keys that are required for register programming and operations.

2. If you wish to program the CASH key, select it immediately after selecting KEY ASSIGNMENT from the SERVICE MODE menu. After the initial key is programmed, the CASH key is used to finalize the program.

Function Key Codes

Code	Function
001~300	NLU 1~NLU 300
301~309	Numeric 1~9
311	DOUBLE ZERO
312	DECIMAL
310	ZERO
313	#/NS
314	% 1
315	% 2
316	% 3
317	% 4
318	% 5

Define Port (SERIAL, USB)

Serial Port Setting

1. At the **SERVICE MODE**, press **5** and **CASH** for serial programming. The port selection screen displays:

```
DEFINE PORT
1. PORT 1
```

```
DEFINE PORT
1. PORT 1
2. PORT 2
3. USB TYPE
4. SCAN
```

2. Enter the digit (1-4) corresponding to the port you wish to program. Press the **4** and **CASH** to print Port1&Port2 settings. The **appropriate PORT PROGRAM** screen displays:
3. Press the **↑** key and the **↓** key for selecting value. Press **CASH** to confirm the option value and return menu.

```
PORT 1
1. BAUD RATE      [9600]
2. PARITY         [NONE]
3. DATA BITS     [8BITS]
4. STOP BITS      [1BIT]
5. DEVICE         [NONE]
6. PRINTER        [NONE]
7. DISPLAY        [EPSON]
8. KP START LINE  [0]
9. KP END LINE    [7]
10. SLIP START LINE [0]
```

4. Press the **CLEAR** key to finalize and return to the DEFINE PORT screen.

Serial Port Settings Screen Program Notes

Option	Description
BAUD RATE	Select 1200, 2400, 4800, 9600, 19200, 38,400, 57,600, or 115,200 from the screen, 9600 is default.
PARITY	Select NONE, EVEN or ODD, NONE is default.
DATA BITS	Select 8 or 7 from the screen, 8 is default.
STOP BITS	Select 1 or 2 from the screen, 1 is default.
DEVICE FUNCTION	Select NONE, PC, PRINTER, SCANNER, POLE or SCALE from the screen, NONE is default.
PRINTER TYPE	Select the printer type connected to this port.
DISPLAY	Select the pole display type connected to this port.
KP START LINE (0-20)	Enter the number of KP START LINE.
KP END LINE (0-20)	Enter the number of KP END LINE.
SLIP START LINE (0-20)	Enter the number of SLIP START LINE.

USB Setting

1. At the **SERVICE MODE**, press **5** and **CASH** for DEFINE PORT.
2. From the DEFINE PORT screen, press **3** and **CASH** for USB TYPE.
3. Press the **↑** key and the **↓** key to select usb type and press the **CASH** key to confirm

DEVICE : MEMORY MEMORY

Note: If you select other types, Your ER-230EJ will be rebooted by itself.

USB Specifications

USB TYPE		USB VERSION	SPEED
PC-COM	For connecting PC	-	-
SCANNER	For using scanner	USB 2.0 (only HID type)	FULL SPEED only
MEMORY	For backup & restore	USB 2.0	FULL SPEED

ECR Setup

1. From **SERVICE MODE**, press **6** and **CASH** for **ECR SETUP** screen displays:

```
          ECR SETUP
1. ROM INFO
```

2. Press the **↑** key and the **↓** key for selecting value. Press **CASH** to confirm the option value and return menu.

```
          ECR SETUP
1. ROM INFO
2. PRINT DENSITY
3. LCD CONTRAST
```

Print Density

1. From **ECR SETUP** menu, press **2** and **CASH** to program 'PRINT DENSITY' screen:

```
          PRINT DENSITY
UP,DOWN / END : CASH
```

2. Press the **↑** key and the **↓** key for selecting value. Press **CASH** to confirm the density level and return to the ECR SETUP menu.

LCD Contrast for 16-Character LCD

1. From **ECR SETUP** menu, press **3** and **CASH** to program 'LCD CONSTRAST' screen:
2. Press **1** and **CASH** key for Customer Rear Display (Two Line).
3. During check Customer Rear Display press the **↑** key and the **↓** key to change contrast. Press **CASH** to confirm and return to the ECR SETUP menu.

Version Information

This selection displays the version, check sum and date of the Flash ROM. You may be asked to check your Flash ROM version if you contact your dealer for assistance.

1. At the **SERVICE MODE**, press the **6** and **CASH** key for ECR SETUP.

ECR SETUP
1. ROM INFO

2. To print Version Information, press **1** and **CASH** key for ROM INFO.
3. The version information is printed and press **CLEAR** key to returns to the **SERVICE MODE** menu.

SD Card Operation

Utilities in this program include:

- Program Backup & Restore
- Report Save
- Pre-Image Logo Loading & Save
- Post-Image Logo Loading & Save

Flash ROM update can also be done by SD card or through a serial connection to a PC.

Note: The SD slot is located in the printer compartment. (SD slot is located to the rear of the receipt printer.) Remove the security screw to access the slot. See 14 for detail.

1. At the **SERVICE MODE**, press **7** and **CASH** for Program Backup Operation.
2. Press **1** and **CASH** for SD operation. The SD screen displays:

```
SD
1. PGM BACKUP
```

```
SD
1. PGM BACKUP
2. PGM RESTORE
3. REPORT SAVE
4. IMAGE SAVE
5. IMAGE LOAD
6. BOOT UP SD
7. BOOT UP COM
```

3. Insert the SD card in the register's SD slot.
4. Enter the digit (1-7) corresponding to the function you wish to access. A complete explanation of each function follows.

Read Carefully: Store Name Notes

The store name you set on "Store name" page 133 is used to identify program and report data on the SD card. Note that the default store name is "STORE001".

If you are using the SD Card to move information to a PC or use the program or report data with the PC Utility, you must pay close attention to the store name. Do not use characters such as "-" or "/" that cannot be used in naming a folder on your PC. If you use such a character in your store name, you will not be able to read the files on your PC.

The Store Name field is 8-characters in length.

Note: If you are Using an SD Card for the First Time . . .

NOTE: SD cards must be formatted as FAT 32.

CAUTION: Formatting the SD card will clear all data on the SD card and prepare it for use.

1. Start Windows Explorer.
2. Select the SD card drive, right click and select *Format*. (Win XP screen shown; slightly different procedures are used with different operating systems.)

3. From the Format dialog you must select the File System: FAT32.

Program Backup and Load

You can use an SD flash memory card to backup and load (restore) the full program.

NOTE: The program data is saved in a separate folder on the SD card named with the store. Note that the default store name is “STORE001”. See page 133 for more information about the store name.

Backing Up the Program to an SD Card

1. Insert the SD card in the register’s SD slot.
2. Move to the **SERVICE MODE**.
3. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
4. From the PROGRAM BACKUP menu select “**1.SD**”.
5. From the SD menu select “**1.PGM BACKUP**”.
 - The ER-230EJ will write the program files to the folder:
ER-230EJ \STORENAME\PGMBACK
 - In the example below, the store name is “SAM4S”.
6. After a short pause, the register will display confirmation of the successful backup with the message “SUCCESS !”. Below is an Explorer view of the backed up files.

Restore Program from the SD Card

CAUTION: Memory allocation must be set the same as the saved program. Be sure to print out the memory allocation so that it can be re-entered before restoring the program.

1. Set the store name to match the name of the store folder you wish to restore.
2. Insert the SD card in the register's SD slot.
3. Move to the **SERVICE MODE**.
4. From the Service Mode menu, select "**7.PROGRAM BACKUP**".
5. From the PROGRAM BACKUP menu select "**1.SD**".
6. From the SD menu select "**2.PGM RESTORE**".
7. The register will display confirmation of the successful restoration with the message "SUCCESS !". If the save is unsuccessful, the register will print an error message.

Saving Reports to an SD Card

The SD card can also be used to save reports. Reports saved are the current X1 readings.

SD Report Notes

1. When backing up and restoring data, the store name must be programmed on page 133 of "Store Name" in the "SYSTEM" of "*Options Programming*". The default store name is "STORE001".

2. The ER-230EJ will write the program files to folder. For example:

ER-230EJ/ STORENAME/SALEBACK/CSVBACK/DATE/TIME or

ER-230EJ /STORENAME/SALEBACK/REPBACK/DATE/TIME

The date folder depends on date format option. See "*SYSTEM*" of "*Options Programming*" in the "*Program Mode*" chapter to set DATE FORMAT.

<u>DATE FORMAT</u>	<u>DATE FOLDER NAME</u>
YYMMDD	20140403
DDMMYY	03042014
MMDDYY	04032014

3. Each individual report is named with the time of the report. For example "CLK02332" represents a Clerk report taken at 23:32 (in a 24-hour time format.) In this manner, multiple reports backed up at different times in the same day will collect in the same "date" folder.

To Save Reports

1. Move to the **SERVICE MODE**.
2. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
3. From the PROGRAM BACKUP menu select “**1.SD**”.
4. From the SD menu select “**3.REPORT SAVE**”.
5. Select type CSV format (for Excel) or REP format (for PC Utility)
6. The register will display confirmation of the successful restoration with the message “**SUCCESS!**” If the save is unsuccessful, the register will print an error message.

Load/Save Receipt Images

You can load a preamble and postamble image on your receipt. Before loading, the images must be converted by the PC Utility to .img format. After conversion, they can be loaded directly by connecting a PC to the ER-230EJ or by copying the images to a SD card and loading (or saving the image) using the SD utility program described here.

Note that after loading the images, you must set “LOGO (Print preamble image / Print postamble image)” of the “Options Programming” in the “Program Mode ” to activate the image printing.

Use the SAM4s PC Utility (eSpresso) to convert the Image

1. Install the *eSpresso* on your PC and run it.
2. If you start the *eSpresso* for the first time, you must define the store and register, or if the store and register is already defined, you can select the store from the register list. The *eSpresso* program starts.
3. At the *eSpresso*, choose Image Logo from the Edit Program menu.
4. Click the FILE OPEN (📁) button. Select the image file that you wish to use from the Open dialog and click the Open command button.
5. You can view the original and the converted image of a selected image.
6. You can change the properties of the image. (Sharpness and Brightness)
7. You can select the PREAMBLE IMAGE or POSTAMBLE IMAGE.

8. Click the DOWN (↓) button. “Download completed” message is displayed.

※ If you want to save the converted image, Click the SAVE (💾) button. (Saved images are stored in My Documents folder.)

Copy the Images to an SD Card

The PC Utility will create two image files:

- USERPRE.IMG
- USERPOST.IMG

They will be located in your PC at:

C:\MyDocuments\eSpresso\Storename\register name\IMAGE

Copy the mages to the following path on your SD card:

SD\ER-230EJ\Storename\IMAGE

Important: In the path: C:\MyDocuments\eSpresso\Storename, the store name is the name you have defined as the store in the PC Utility.

Note: You must use the same store name in the ER-230EJ ECR at “Store name” of “SYSTEM” of the “Options Programming” in the “Program Mode”. Note that the default store name is “STORE001”.

Saving Images from an ER-230EJ to an SD card

1. Insert the SD card in the register’s SD slot.
2. Move to the **SERVICE MODE**.
3. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
4. From the PROGRAM BACKUP menu select “**1.SD**”.
5. From the SD menu select “**4.IMAGE SAVE**”.
6. The message “SUCCESS !” will display on the LCD.

Loading the Images by SD card

1. Insert the SD card in the register’s SD slot.
2. Move to the **SERVICE MODE**.
3. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
4. From the PROGRAM BACKUP menu select “**1.SD**”.
5. From the SD menu select “**5.IMAGE LOAD**”.
6. The message “SUCCESS !” will display on the LCD.

Flash ROM Updates

The ER-230EJ register software is loaded in flash ROM. This program may occasionally be updated by the manufacturer. Your SAM4S dealer can update the software if necessary. The Flash ROM can be loaded through a PC or by SD card.

CAUTION: Flash ROM update by either method must be done by a qualified, trained technician. DO NOT POWER OFF OR ABORT any program loading once it has started. Failure to follow the procedures exactly may cause the program to load incompletely and for the register to fail completely.

Flash ROM Update by SD

The ER-230EJ Flash ROM program is contained in a binary file. This file contains both the Boot program area and the Application program area.

1. Copy binary file to the update folder of the SD card. :
SD:/update/NR_ROM.bin
2. Insert the SD card into the register. (The SD slot is located inside the printer compartment. Remove the security screw and open the flap securing the SD slot. Insert the SD card until you hear a click sound and the SD card is locked in.)

Boot Area Update

3. At the ER-230EJ, move to the **SERVICE MODE**.
4. Press the ↑ key and the ↓ key to select menu and press the **CASH** key to confirm. Select the **7.PROGRAM BACKUP** menu. Then select “**1.SD**”.
5. Select the **6.BOOT UP SD** menu.
6. After a short pause, the register will display confirmation of the successful download with the message “**DOWNLOAD 100 % FINISHED! !**”
7. Turn the ECR power switch OFF/ON and proceed directly to the next step: Application Update.

Program Area Update

8. Set the **SERVICE MODE**.
9. Press the upper right key and the lower right key. A rapid beep-beep-beep sound will be heard. Release the upper right key and the lower right key.
10. Press the ↑ key and the ↓ key to select menu and press the **CASH** key to confirm. Select the **2.SD** menu.
11. The display will flash (Current program is being erased), after a few seconds, the display will continue to flash, but at a slower rate. This continues for about 1-minute while the new program is being loaded. When the load is complete, a rapid beep-beep-beep sound will be heard again the display will stop flashing and display a blue color to confirm update completion.

12. Power the register OFF. The FLASH ROM update is complete.
13. Remove the SD card from the register.
14. Perform a memory all clear on the ECR. The ECR is now ready to program or to load a previously saved end-user program.

Flash ROM Update by PC Update Files

To complete the firmware update, you will be supplied with the following files:

- DownLoad.exe (The update utility program)
- Binary file

PC Connection Cable

YOU MUST USE Port #1. Use the following cable:

- Register RJ-45 COM 1 to PC DB-9F

Boot Area Update

1. Connect the Serial Cable From ECR to PC.
2. At the register, move to the **SERVICE MODE**.
3. Press the ↓ key and the ↑ key to select menu and press the **CASH** key to confirm. Select the **“7.PROGRAM BACKUP”** menu. Then select **“1.SD”**.
4. Select the **7.BOOT UP COM** menu.
5. At the PC, execute the program “DownLoad.exe”. The Download dialog box displays.

6. Select the appropriate com port connection at your PC at the PORT# option buttons.

7. Click  find the folder where the update files are located and select binary file.

8. Select **Boot Area Only** in the Select One option buttons.
9. Press **OK** Button. The download takes about 30 seconds; the scroll bar will track the progress of the download. At the ECR, the display will flash slowly while the update is taking place.
10. When complete, the message **Completed** displays on the PC. Click **OK** and the Download program will close. At the ECR, the display will change to a blue color indicating the update is complete. Turn the power switch to the **OFF**.

Program Area Update

1. Connect the Serial Cable From ECR to PC.
2. At the register, move to the **SERVICE MODE**.
3. Turn the power switch to the **OFF** position.
4. Press the upper right key and the lower right key. A rapid beep-beep-beep sound will be heard. Release the upper right key and the lower right key.
5. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm. Select the **1.SERIAL1** menu.
6. At the PC, execute the program "Download.exe". The Download dialog box displays.
7. Select the appropriate com port connection at your PC at the PORT# option buttons.
8. Click  find the folder where the update files are located and select binary file.
9. Select **Program code + Font** in the Select One option buttons.
10. Press **OK** Button. The download takes about 3 minutes. At the PC, the scroll bar will track the progress of the download. At the ECR, The display will flash (Current program is being erased), after a few seconds, the display will continue to flash, but at a slower rate. This continues for about 3 minutes while the new program is being loaded.
11. When complete, the message **Completed** displays at the PC. Click **OK** and the Download program will close. At the ECR, when the load is complete, a rapid beep-beep-beep will be heard, and the display will flash rapidly. Turn the power switch to **OFF**, the program update is complete.
12. Disconnect the PC cable.
13. Perform a memory all clear on the ECR. The ECR is now ready to program or to load a previously saved end-user program.

USB Operation

Utilities in this program include:

- Program Backup & Restore
- Report Save
- Pre-Image Logo Loading & Save
- Post-Image Logo Loading & Save

1. At the **SERVICE MODE**, press **7** and **CASH** for Program Backup Operation.
2. Press **2** and **CASH** for SD operation. The USB screen displays:

```
SD
1. PGM BACKUP
```

```
SD
1. PGM BACKUP
2. PGM RESTORE
3. REPORT SAVE
4. IMAGE SAVE
5. IMAGE LOAD
```

3. Insert the USB memory in the register's USB slot.
4. Enter the digit (1-5) corresponding to the function you wish to access. A complete explanation of each function follows.

Read Carefully: Store Name Notes

The store name you set on "Store name" page 133 is used to identify program and report data on the USB memory. Note that the default store name is "STORE001".

If you are using the USB memory to move information to a PC or use the program or report data with the PC Utility, you must pay close attention to the store name. Do not use characters such as "-" or "/" that cannot be used in naming a folder on your PC. If you use such a character in your store name, you will not be able to read the files on your PC.

The Store Name field is 8-characters in length.

Note: If you are Using an USB memory for the First Time . . .

NOTE: USB memory must be formatted as FAT 32.

CAUTION: Formatting the USB memory will clear all data on the USB memory and prepare it for use.

See page on 86 for detail.

Program Backup and Load

You can use an USB flash memory card to backup and load (restore) the full program.

NOTE: The program data is saved in a separate folder on the USB memory named with the store. Note that the default store name is “STORE001”. See page 133 for more information about the store name.

Backing Up the Program to an USB memory

1. Insert the USB memory in the register’s USB port.
2. Move to the **SERVICE MODE**.
3. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
4. From the PROGRAM BACKUP menu, select “**2.USB**”.
5. From the USB menu, select “**1.PGM BACKUP**”.
 - The ER-230EJ will write the program files to the folder:
ER-230EJ\STORENAME\PGMBACK
 - In the example below, the store name is “SAM4S”.
6. After a short pause, the register will display confirmation of the successful backup with the message “SUCCESS !”. Below is an Explorer view of the backed up files.

Restore Program from the USB memory

CAUTION: Memory allocation must be set the same as the saved program. Be sure to print out the memory allocation so that it can be re-entered before restoring the program.

1. Set the store name to match the name of the store folder you wish to restore.
2. Insert the USB memory in the register's USB port.
3. Move to the **SERVICE MODE**.
4. From the Service Mode menu, select "**7.PROGRAM BACKUP**".
5. From the **PROGRAM BACKUP** menu, select "**2.USB**".
6. From the USB menu select "**2.PGM RESTORE**".
7. The register will display confirmation of the successful restore with the message "SUCCESS !". If the save is unsuccessful, the register will print out an error message.

Saving Reports to an USB memory

The USB memory can also be used to save reports. Reports saved are the current X1 readings.

USB Report Notes

1. When backing up and restoring data, the store name must be programmed on page 133 of "Store Name" in the See "SYSTEM" of "*Options Programming*". The default store name is "STORE001".

2. The ER-230EJ will write the program files to folder. For example:

ER-230EJ /STORENAME/SALEBACK/REPBACK/DATE/TIME

The date folder depends on date format option. See "SYSTEM" of "*Options Programming*" in the "*Program Mode*" chapter to set DATE FORMAT.

<u>DATE FORMAT</u>	<u>DATE FOLDER NAME</u>
YYMMDD	20150403
DDMMYY	03042015
MMDDYY	04032015

3. Each individual report is named with the time of the report. For example "CLK02332" represents a Clerk report taken at 23:32 (in a 24-hour time format.) In this manner, multiple reports backed up at different times in the same day will collect in the same "date" folder.

To Save Reports

1. Insert the USB memory in the register's USB port.
2. Move to the **SERVICE MODE**.
3. From the Service Mode menu, select "**7.PROGRAM BACKUP**".
4. From the **PROGRAM** menu, select "**2.USB**".
5. From the USB menu select "**3.REPORT SAVE**".
6. The register will display confirmation of the successful restore with the message "SUCCESS !". If the save is unsuccessful, the register will print out an error message.

Load/Save Receipt Images

You can load a preamble and postamble image for your receipt. Before loading, the images must be converted by the PC Utility to .img format. After conversion, they can be loaded directly by connecting a PC to the ER-230EJ or by copying the images to a USB memory and loading (or saving the image) using the USB utility program described here.

Note that after loading the images, you must set "LOGO (Print preamble image / Print postamble image)" of the "Options Programming" in the "Program Mode" to activate the image printing.

Preparing a Graphic Logo Bitmap for an ER-230EJ

See page on 90 for detail.

Use the PC Utility to Convert the Image

See page on 90 for detail.

Copy the Images to an USB memory

The PC Utility will create two image files:

- USERPRE.IMG
- USERPOST.IMG

They will be located in your PC at:

C:\MyDocuments\eSpresso\Storename\register name\IMAGE

Copy the mages to the following path on your USB memory:

USB\\ ER-230EJ \Storename\IMAGE

Important: In the path: C:\MyDocuments\eSpresso\Storename, the store name is the name you have defined as the store in the PC Utility.

Note: You must use the same store name in the ER-230EJ ECR at “Store name” of “SYSTEM” of the “*Options Programming*” Note that the default store name is “STORE001”.

Saving Images from an ER-230EJ to an USB memory

1. Insert the SD card in the register’s USB slot.
2. Move to the **SERVICE MODE**.
3. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
4. From the PROGRAM BACKUP menu select “**2.USB**”.
5. From the USB menu select “**4.IMAGE SAVE**”.
6. The message “SUCCESS !” will display on the LCD.

Loading the Images by USB memory

7. Insert the SD card in the register’s USB slot.
8. Move to the **SERVICE MODE**.
9. From the Service Mode menu, select “**7.PROGRAM BACKUP**”.
10. From the PROGRAM BACKUP menu select “**2.USB**”.
11. From the USB menu select “**5.IMAGE LOAD**”.
12. The message “SUCCESS !” will display on the LCD.

Program Mode

Introduction

ER-230EJ allows you register sales much faster and with more accuracy. Additionally, you could register numerous clerks and restrict them from accessing to other Mode. It is possible to set all options in Program Mode and you could see all setting values by printing it out.

Descriptor Programming Methods

Descriptors can be programmed for PLUs, function keys, groups, clerks and the logo/messages. Two methods are available to program descriptors, the Program Overlay Method and the Descriptor Code Method. This chapter describes both methods. Refer to each program area for specific steps for programming PLUs, groups, function keys, etc.

Descriptor Overlay Method (SMS mode)

This method is the default descriptor program method. When the descriptor field is selected on the program screen, you can simply type the descriptor placing a copy of the overlay over the keyboard. Press **CASH** to finalize your descriptor.

Program Example

To program the descriptor "20%" type:

To use BACK and program the descriptor "APPLE" type:

To program the descriptor "Apple" type:

NOTE: Use the CAPSkey to toggle between upper and lower case descriptor options.

To program the descriptor “APPLE” with DOUBLE (wide) characters type:

NOTE: Use the **DOUBLE** to toggle to between double and normal size descriptor options.

Keyboard Overlay

FEED		EXIT			DOUBLE	CAPS	SKIP		
		7	8	9	4 PQR	8 STUV	12 WXYZ	BACK	
		4	5	6	3 GHI	7 JKL	11 MNO	\$ ■ £ €	
		1	2	3	2 % - " ? !	6 ABC	10 DEF	SUBTOTAL	
		0	00	.	1 SP * + @	5 : , &	9 . (-)	CASH	

Descriptor Code Method

If you customize your keyboard by covering key locations, or by installing double or quad size keys, you will need to program descriptors using the descriptor code method. See “SYSTEM” of “*Options Programming*” on page 133. You must set the “DESC. PGM METHOD” option to be CODE TYPE.

Program Sequence

1. With the cursor pointed at a descriptor field, refer to the Descriptor Code Chart below and type the code for the first character.
2. For each additional character, type the code. Each character will be displayed as it is entered.
3. Press **CASH** when the descriptor is complete.

Program Example

To program the descriptor "APPLE", type:

```
[065]   [080]   [080]   [076]   [069]   [CASH]
  A     P     P     L     E
```

For DOUBLE (wide) characters enter **999** after the descriptor code. For example:

```
Ⓐ = [999] [065] [CASH]
```

10. PGM SCAN
```

PLU Programming

To accommodate UPC scanning, each PLU can be given an identifying number up to 14 digits in length.

1. At the **PROGRAM MODE**, press **1** and **CASH** for PLU Programming. The **PLU PROGRAMMING** screen displays:

PLU 1. ADD/CHANGE 2. DELETE 3. PLU STOCK 4. NLU CODE# PGM

Add/Change PLU Add/change One PLU

2. From the PLU PROGRAMMING screen, Press **1** and **CASH** to add or change a PLU screen:

ADD/CHANGE 1. ONE PLU 2. RANGE PLU
--

3. Press **1** and **CASH** to select individual PLU. The PLU NUMBER screen displays:

ENTER PLU # 0

4. Enter PLU number and **CASH** to select individual PLU.
5. Refer to "*PLU Options - Reference Information*" on page 108 to make program entries or changes, press the **CLEAR** key to finalize and return to the previous screen.

Add/change Range PLU

2. From the ADD/CHANGE screen, Press **2** and **CASH** to select RANGE PLU. The PLU NUMBER screen displays:

ENTER FROM PLU # 0

3. Enter FROM PLU number and **CASH** to display TO PLU# screen:

ENTER FROM PLU #	1
ENTER TO PLU#	20

4. Enter TO PLU number and **CASH** to display PLU OPTIONS.
5. Refer to "*PLU Options - Reference Information*" on page 108 to make program entries or changes, press the **CLEAR** key to finalize and return to the previous screen.

PLU Options - Reference Information

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a descriptor for each PLU. Type the descriptor using the Program Overlay, or by using the descriptor code method (see page 102.) The overlay is automatically activated when the cursor is pointing at the DESC field. The default descriptors are PLU1, PLU2, etc.
PRICE/HALO1 PRICE/HALO2	7 digit amount	Up to five price levels are available. (Note that price level fields 2 will display only if you allocate memory for additional price levels.) If the PLU is open, the amount entered here is the high amount lock out (HALO). You can limit errors by setting the maximum amount that can be entered into a PLU. If the PLU is preset, the amount entered here is the amount that is registered automatically when the PLU is entered.
PRESET	Y or N	Choose Y for a preset PLU. Choose N for an open PLU. Open PLUs accept amount entries. Use open PLUs to enter different priced items into the same PLU. Preset PLUs automatically register a preprogrammed price when the PLU is entered. Use preset PLUs to register an individual item quickly and accurately. For example, cigarette packs can be assigned to PLUs.
PRESET OVERRIDE	Y or N	If Y, you can enter a price to override the preset price.
TAXable BY TAX1 TAXable BY TAX2 TAXable BY TAX3 TAXable BY TAX4	Y or N	Select N for non taxable items. Select Y to apply the appropriate tax automatically for this PLU.
GROUP #1 GROUP #2 GROUP #3	0-99	For each of three group assignments, enter a group where this PLU's sales will accumulate. The number of groups available is determined by memory allocation.

Option	Entry	Description
NEGATIVE ITEM	Y or N	Select Y to register items that subtract, rather than add to the sale total.
HASH	Y or N	Items designated with HASH status add to the current sale, but do not add to the registers grand total. HASH items may or may not add to the net sales total - see "SYSTEM" of "Options Programming" in the "Program Mode" chapter. Use hash for lottery sales or bottle deposits.
SINGLE ITEM	Y or N	Select Y for a single item PLU. Single item PLUs automatically total as a cash sale immediately after the PLU entry. Single item PLUs are used to speed up one item sales.
NON-ADD # COMP	Y or N	Select Y to enforce the entry of a non-add number before a registration can be made.
INVENTORY ITEM	Y or N	Select Y if you wish to track the number of items remaining in inventory using the Stock report.
DISABLE	Y or N	Select Y to disable the PLU. Entries can not be made into disabled PLUs.
CONDIMENT	Y or N	Select Y if you wish the item to act like a condiment on the kitchen printer. Items with this status will satisfy the requirements of items with compulsory condiment status.
COMPULSORY CONDIMENT	Y or N	Select Y if you wish to force the entry of a condiment after this item is entered.
PRINT ON RECEIPT	Y or N	Select N if you wish to suppress printing of the item on the receipt.
DISPLAY PLU	Y or N	Select Y if you wish to display the item on the display.
PRT PRICE ON RECEIPT	Y or N	Select N if you wish to suppress printing of the item's price on the receipt.
DISABLE PROMO	Y or N	Select Y to block the PROMO function on this PLU.
COUNTER NOT RESET	Y or N	Select Y if you do not wish to reset the PLU item counter on the Z PLU report.
PRESET OVERRIDE IN MGR CONTROL	Y or N	If preset override is Y , then you can force manager control for preset override by setting this option to Y .
DISABLE RETURN & VOID	Y or N	If Y , you cannot correct this PLU through void operations (Void Item/ Error Correct/VOID Mode) or perform a merchandise return of this PLU item. The Y value is recommended when using liquor control systems.
PRICE CHANGE ITEM	Y or N	Select Y to change price on this PLU.
ALLOW DISCOUNTS	Y or N	Select Y to allow Discounts on this PLU.

Option	Entry	Description
MIX&MATCH#	0-99	Enter a value (1-99) to indicate the number of the preprogrammed MIX&MATC TABLE. Enter 0 to disable
LINK PLU	14 digit maximum	If you wish the registration of this PLU to automatically cause the registration of another PLU, enter the PLU # you wish to link with the 10-key pad. Enter 0 for no link.
QTY/MODIFIER1 QTY/MODIFIER2	0-99.99	Enter quantity modifier count.
MINIMUM STOCK	0-9999.99	Enter Minimum Stock amount.

Delete PLU

Note: Before a PLU can be deleted, all report information must be cleared. It may be necessary to run a Z1 and Z2 PLU Report, and if the PLU is an inventory item, you must change the stock to zero.

If PLUs had been registered by using the NOT FOUND PLU function, RESET N.F PLU must be issued. See page on 59 for details.

Delete One PLU

1. From the **PLU PROGRAMMING** screen, press **2** and **CASH** to display the **DELETE PLU** screen:

DELETE
1. ONE PLU
2. RANGE PLU

2. Press **1** and **CASH** to delete an individual PLU. The **PLU NUMBER** screen displays:

ENTER PLU #	0
-------------	---

3. Enter the number of the PLU you wish to delete and press **CASH**. The **DELETE** message will print.

Delete PLU Range

1. From the **PLU PROGRAMMING** screen, press **2** and **CASH** for to display the **DELETE PLU** screen:

DELETE
1. ONE PLU
2. RANGE PLU

2. Press **2** and **CASH** to delete a range of PLUs. The **PLU NUMBER** screen displays: Enter the number of FROM PLU# in the range you wish to delete. Press **CASH**.

ENTER FROM PLU#	0
-----------------	---

3. Enter the number of TO PLU# in the range you wish to delete.

ENTER TO PLU #	20
----------------	----

4. Press **CASH** to delete the PLU. The **DELETE** message will print.
5. Continue to delete another PLUS or press **CLEAR** key until return to **PROGRAM MODE** menu.

PLU STOCK

Note: Before program PLU stock, 'Inventory Item' option set as 'Y' in PLU programming.

1. From the **PLU PROGRAMMING** screen, press **3** and **CASH** to display the **PLU STOCK** screen:

PLU STOCK 1. ONE 2. RANGE

2. Select the PLU or PLUs you wish to program one of the following ways.

ONE PLU

3. From the **PLU STOCK** screen, press **1** and **CASH** to add an individual PLU. The **PLU NUMBER** screen display:

ENTER PLU # 0

RANGE PLU

3. From the **PROGRAM** screen, press **2** and **CASH** to display **RANGE PLU** screen.

ENTER FROM PLU # 0

4. Enter **FROM PLU#** number and **CASH** to display **TO PLU#** screen:

ENTER FROM PLU# 1

ENTER TO PLU# 20

5. Enter **TO PLU#** number and **CASH** to display **STOCK ENTRY** screen:

OPERATOR: ADD (+) ADD (+)

6. Select operator **ADD(+)**, **SUB(-)** or **REPLACE**.
7. Enter the stock quantity you wish to **ADD/SUBTRACT/REPLACE**, and press **CASH**. Note that stock is kept in decimal units and you must enter new or additional stock to two digits beyond the decimal. For example, type **1000** to enter ten units of inventory.
8. To program a additional PLUs repeat step 3 or press **CLEAR** key to finalize.

NLU Code# Program

NLUs are fixed keys on the keyboard (like traditional department keys) that access specific PLUs.

On the default keyboard the PLU# assigned to the NLU key is the same, i.e. NLU key number one is PLU #1. However, with this program, you can assign any PLU number you wish to any one of the NLU keys.

1. From the **PLU PROGRAMMING** menu, press **4** and **CASH** for **NLU CODE# PGM.** The **NLU CODE PROGRAM** screen displays:

```
NLU CODE# PGM
ENTER NLU KEY
```

2. Press the NLU key on the keyboard you wish to program, or press **CLEAR** to exit.

```
ENTER NEW PLU #
0
```

3. The current PLU code number displays. Type the new PLU code number you wish to use for this NLU key, press **CASH**.
4. The **NLU CODE PROGRAM** screen returns. Continue from step 1 to program additional NLU keys, or press **CLEAR** to exit.

Group Programming

Up to 99 groups (**the exact number is determined by memory allocation**) are available to summarize PLU sales. Group totals appear on reports, so that you can track sales of different types of items.

- The group descriptors programmed here will replace the default descriptors GROUP 1 through GROUP 99 that appear on reports.
- Each PLU can report totals to one, two or three different groups. If a PLU sends totals to more than one Group, the Group total that appears on the Group report will not represent PLU sales. Therefore, you also have the option of deciding whether each Group's total will add to the Group total on the Group report.

To Program Groups

1. At the **PROGRAM MODE**, press **2** and **CASH** for **GROUP**. The **GROUP PROGRAMMING** screen displays: (The maximum group number is set by memory allocation.)

```
ENTER GROUP #
(1-10)                                0
```

2. Enter the number of the group to be programmed, press the **CASH**. The **GROUP# PROGRAMMING** screen displays:

```
GROUP
1. DESC: [GROUP01]
```

```
GROUP
1. DESC: [GROUP 01]
2. ADD TO GROUP TOTAL[Y]
3. SEND TO KP [N]
4. KP PORT#: RCPT [N]
5. KP PORT#: 1 [N]
6. KP PORT#: 2 [N]
7. PRINT RED ON KP [N]
```

3. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm. Select the Group option you wish to program.
4. Press the **↑** key for YES and the **↓** key for NO.
Press **CLEAR** to return to the GROUP PROGRAMMING screen. Continue to program groups as necessary. Press **CLEAR** to return to the PROGRAM MODE screen.

Group Programming - Reference Information

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a descriptor for each group. Type the descriptor using the Program Overlay or by using the descriptor code method (see page 102.). The overlay is automatically activated when the cursor is pointing at the DESC field. The default descriptors are GROUP 01, GROUP 02, etc.
ADD TO GROUP TOTAL	Y or N	Select N if you do not wish this groups total to be added to the total of all groups on the Group report.
SEND TO KP	Y or N	Select Y if you wish to send PLUs reporting to this group to a kitchen printer.
KP PORT #: RECEIPT	Y or N	Select Y if you wish to print a kitchen requisition at the register.
KP PORT #: 1	Y or N	Select Y if you wish to print a kitchen requisition at the Port1.
KP PORT #: 2	Y or N	Select Y if you wish to print a kitchen requisition at the Port2.
PRINT RED ON KP	Y or N	Select Y if you wish items reporting to this group to print in red on the kitchen printer. (Note, the kitchen printer must have red/black printing capability, and this option does not apply to the register receipt printer.)

Function Key Programming

1. From the PROGRAM MODE, press **3** and **CASH** for FUNCTION KEY. The FUNCTION KEY PROGRAM screen displays:

```
FUNCTION KEY
1. FUNCTION KEY
```

2. Press **1** and **CASH** to select FUNCTION KEY menu.

```
ENTER FUNC. KEY
TO BE PROGRAMMED
```

3. Press the function key you wish to program.
4. For example, Press the #/NS key to view the #/NS function key options:
5. Press the ↓ key to view the next menu. Press the ↑ key to view the previous menu.
6. Press the **CASH** to set option value.
7. From the YES/No type option screen, Press the ↑ key for YES and the ↓ key for NO. Press the **CASH** to confirm the option value.
8. Press **CLEAR** at anytime to return to the FUNCTION KEY menu without saving changes.

#/NS

#/NS Function Options

Option	Entry	Description
DESC1	Alpha numeric 24 character	You can program a unique descriptor for the no sale function. The default descriptor is NOSALE.
DESC2	Alpha numeric 24 character	You can program a unique descriptor for the non add # function. The default descriptor is NON ADD #.
NO SALE KEY DISABLE	Y or N	Select Y to disable the no sale function (non-add entries are allowed).
UNDER MANAGER CONTROL	Y or N	Select Y to allow operation only in manager operation mode.
INHIBIT NO SALE AFTER NON-ADD #	Y or N	Select Y if you want disable the NO SALE function after a non-add number is entered.
COMP. # AT START OF SALE	Y or N	Select Y if you wish to enforce the entry of a non-add number at the beginning of each transaction. (For example, to track the number of customers in each sale or to identify a customer number with each sale.)
PRINT ON N/S	Y or N	Select N to stop printing when a NO SALE is performed.
NON-ADD # PROHIBIT	Y or N	Select Y to disable the non-add # function.
COMP NON-ADD # MUST MATCH MAX DIGIT	Y or N	Select Y if you wish all non-add number entries to have the exact number of digits selected in the MAX DIGIT flag below.
MAX DIGIT (0-8)	0-8	Enter the maximum number of digits for non-add number entry. Zero (0) means no limit.

%1 -%5

%1 -%5 Function Options

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptors are % 1-4.
AMOUNT:Y %:N	Y or N	Select Y if you wish for this key to apply an amount (as in a coupon). Select N if you wish for this key to apply the percentage (as in a discount or surcharge).
AMOUNT/RATE	5 digit	If the function is an amount, enter the amount from 0 to 999.99. If not zero, the amount will be the preset coupon amount. If the function is a percentage, enter a percentage from 0 to 99.999%. If not zero, the percentage will be the preset percentage
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator to use this function in REGISTER mode. When selected, the function is allowed only in the MANAGER MODE .
OPEN:Y PRESET:N	Y or N	Select Y if you wish the amount or percentage to be entered by the operator; select N if you wish the amount or percentage to be preset.
SALE:Y ITEM:N	Y or N	Select Y if you wish the amount or percentage to apply to the sale total. Select N if you wish the amount or percentage to apply to an item.
OVERRIDEABLE	Y or N	Select Y if you wish to enter a percentage or amount to override the preset percentage or amount set in the RATE field.
POS.:Y NEG:N	Y or N	Select Y if you wish for the amount or percentage to add to the sale total. Select N if you wish for the amount or percentage to subtract from the sale.
TAXable BY TAX1 TAXable BY TAX2 TAXable BY TAX3 TAXable BY TAX4	Y or N	Select N to tax any taxable items before the discount or surcharge is applied (tax the gross amount). Select Y to tax any taxable items after the discount or surcharge is applied (tax the net amount).
ALLOW ONLY ONE TIME SUBTOTAL ENTRY	Y or N	If Y , you can enter only a single coupon and you must press the SUBTOTAL key before the coupon entry.

ALLOW MULTIPLE AMOUNT DISCOUNT (COUPON) WITHOUT SUBTOTAL ENTRY	Y or N	If you set a % key to be used for vendor coupons (i.e. amount, negative and sale status) then choose Y to allow the function to be operated multiple times, without requiring the SUBTOTAL key to be pressed prior to the coupon entry.
PRESET OVERRIDE IN MGR ONLY	Y or N	Select Y to allow preset override only in manager operation mode.
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

ADD CHECK

ADD CHECK Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is ADD CHECK.
KEY DISABLE	Y or N	Select Y to disable this function.
COMPULSORY BEFORE TENDERING	Y or N	Select Y if you want to force the operator to use the ADD CHECK function before tendering.
ADVANCE THE CONSECUTIVE #	Y or N	Select Y if you want to advance the consecutive number each time the ADD CHECK key is used.
DELETE THE PRE/POSTAMBLE	Y or N	Select Y if you want to delete the preamble and postamble each time the ADD CHECK key is used.
EXEMPT TAX 1 EXEMPT TAX 2 EXEMPT TAX 3 EXEMPT TAX 4	Y or N	Select Y to exempt the appropriate tax automatically when finalized with this key.
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

CANCEL

CANCEL Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is CANCEL.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

CASH

CASH Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is CASH.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be tendered. "0" means that there is no entry limit.
AMOUNT TEND COMP.	Y or N	Select Y if you want to force the operator to enter the tendered amount and let the register calculate the change.
OVER/UNDER TENDER IN MGR CONTROL	Y or N	Select Y if you do not want the operator to tender more than the amount of the sales and issues to be changed. When selected, over and under tendering is allowed only in the MANAGER MODE .
DISABLE UNDER TEND.	Y or N	Select Y if you do not want the operator to tender less than the amount of the sale.
DOES DRAWER OPEN	Y or N	Select N if you do not want the drawer to be opened with this key.
EXEMPT TAX 1- 4	Y or N	Select Y to exempt the appropriate tax automatically when finalized with this key.
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

CHARGE 1-8

CHARGE 1-8 Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptors are CHARGE 1-8.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be tendered. "0" means that there is no entry limit.
AMOUNT TEND COMP.	Y or N	Select Y if you want to force the operator to enter the tendered amount and let the register calculate the change.
OVER/UNDER TENDER IN MGR CONTROL	Y or N	Select Y if you do not want the operator to tender more than the amount of the sale and issue change. When selected, over tendering is allowed only in the MANAGER MODE .
DISABLE UNDER TEND.	Y or N	Select Y if you do not want the operator to tender less than the amount of the sale.
DOES DRAWER OPEN	Y or N	Select N if you do not want the drawer to be opened with this key.
ALLOW OVER TEND.	Y or N	Select Y if you wish to allow tender greater than the amount of the sale.
NON-ADD # ENTRY COMPULSORY	Y or N	Select Y if you wish to enforce the entry of a non-add number prior to tendering.
EXEMPT TAX 1 – TAX4	Y or N	Select Y to exempt the appropriate tax automatically when finalized with this key.
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

CHEQUE

CHEQUE Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is CHEQUE.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be tendered. "0" means that there is no entry limit.
AMOUNT TEND COMP.	Y or N	Select Y if you want to force the operator to enter the tendered amount and let the register calculate the change.
OVER/UNDER TENDER IN MGR CONTROL	Y or N	Select Y if you do not want the operator to tender more than the amount of the sale and issue change. When selected, over tendering is allowed only in the MANAGER MODE .
DISABLE UNDER TEND.	Y or N	Select Y if you do not want the operator to tender less than the amount of the sale.
DOES DRAWER OPEN	Y or N	Select N if you do not want the drawer to be opened with this key.
EXEMPT TAX 1 EXEMPT TAX 2 EXEMPT TAX 3 EXEMPT TAX 4	Y or N	Select Y to exempt the appropriate tax automatically when finalized with this key.
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

CURRENCY CONVERSION 1-4

Currency Exchange Rate Programming Examples

Note: Foreign currency exchange rates can be stated as “foreign currency in dollars”, or “dollars in foreign currency”. Use the rate stated in “dollars in foreign currency” when you are programming this section.

The US dollar (home currency) is worth 1.3720 Canadian dollars (foreign currency).

RATE: 13720 NUMBER OF DEC.: 4

The US dollar (home currency) is worth 110.24 Japanese Yen (foreign currency).

RATE: 11024 NUMBER OF DEC.: 2

CURRENCY CONVERSION 1-4 Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor for each foreign currency. The default descriptors are CONV 1-4.
EXCHANGE RATE	7 digits	Enter the exchange rate of up to 7 digits (do not enter the decimal point). See the examples.
DECIMAL PLACE	0 - 4	Enter a number from 0 to 4 to indicate the decimal position of the exchange rate. Count the decimal position from the right. See the examples below.

ERROR CORRECT

ERROR CORRECT Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is ERRCORR.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

PRICE LEVEL 1-2

LEVEL 1-2 Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptors are LEVEL1, LEVEL2, etc.
SEND DESCRIPTION TO KP	Y or N	Determines whether the level descriptor will be printed with the item at the KP.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
PRINT ON RECEIPT	Y or N	Select Y to print level descriptor on receipt.
PREVENT ZERO PRICE SALE	Y or N	Select Y if you do not want register zero price items.
ALTERNATIVE ZERO PRICE LEVLE	0-2	Choose price level to use if PLU price is zero.

RETURN

RETURN Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is MDSE RETURN.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

MODIFIER 1-5

MODIFIER 1-5 Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptors are MOD1 - MOD5.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
AFFECT PLU #	Y or N	Select Y , if you wish the modifier entry to modify the PLU and cause a different item/price to be registered. Select N to only add the modifier descriptor.
PRINT ON RECEIPT	Y or N	Select N to suppress printing of the modifier descriptor on the receipt.
AFFECT DIGIT OF PLU #	1-14	Preceding a PLU with a Size and/or Modifier key manipulates the PLU code assigned to the PLU key, causing a different PLU to be registered when the PLU key is pressed. Enter the digit of the PLU number you wish to be changed when using this key. (Digit #1 is the rightmost digit; digit #14 is the leftmost digit.)
VALUE OF AFFECTED	0-9	Enter the value you wish to be added in the digit position selected. For example, if you wish to affect PLU digit #4

DIGIT (0-9)		with a value of 1, then pressing this modifier key prior to the registration of PLU #17 will result in the registration of PLU #1017.

PAID OUT 1-3

PAID OUT 1-3 Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptors are PO 1-3.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator to use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

PROMO

PROMO Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is PROMO.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator to use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
TAXABLE BY TAX1 TAXABLE BY TAX2 TAXABLE BY TAX3 TAXABLE BY TAX4	Y or N	If an item is taxable and you wish to remove taxes and a cost of the item when using the PROMO key, set the taxable status for the appropriate tax to Y .

RECD ON ACCT 1-3

RECD ON ACCT 1-3 Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptors are RA 1-3.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

SUBTOTAL

SUBTOTAL Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is SUBTOTAL.
KEY DISABLE	Y or N	Select Y to disable this function.

TAX EXEMPT

TAX EXEMPT Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is TAXEXMT.
EXEMPT TAX 1 EXEMPT TAX 2 EXEMPT TAX 3 EXEMPT TAX 4	Y or N	Select Y or N for each tax to determine which tax or taxes are exempted when this key is used.
NON-ADD # COMP	Y or N	Select Y if you wish to force the entry of a non-add number (i.e. a tax exempt #) before the key is used.
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

VOID

VOID ITEM Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is VOID.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

WASTE

WASTE Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is WASTE.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .
COMPULSORY VALIDATION	Y or N	Choose Y to enforce validation if an optional printer with validation capability is connected to a serial port.

ALPHA TEXT

ALPHA TEXT Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is ALPHA TEXT.
PRINT ON KP	Y or N	Select Y to print text on Kitchen Printer.
PRINT ON RECEIPT	Y or N	Select Y to print text on register.
PRINT DOUBLE SIZE	Y or N	Select Y to print text with double size font.

AUTO CASH1-8

AUTO CASH1-8 Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is AUTO CASH1-8.
HALO	7 digit amount	You can limit errors by setting the maximum amount that can be used with this function. "0" means that there is no entry limit.

PRICE CHANGE

PRICE CHANGE Key Program Notes

Option	Entry	Description
DESC	Alpha numeric 24 character	You can program a unique descriptor. The default descriptor is PRICE CHG.
PRICE CHANGE	NONE YES PROMPT	Choose N if you do not want to disable the function. Select YES if you want to save the price. Select PROMPT you can show message before save the new price.
KEY DISABLE	Y or N	Select Y to disable this function.
UNDER MANAGER CONTROL	Y or N	Select Y if you do not want the operator use this function in REGISTER MODE . When selected, the function is allowed only in the MANAGER MODE .

Macro Key Programming

Macro keys may be programmed to record, and then later perform, up to 50 keystrokes. For example, a macro key could be set to tender (preset tender) a common currency, such as £5 into the **CASH** key. Use this program to record keystrokes for each of the 10 possible macro keys.

To Program a Macro

1. From the **PROGRAM MODE**, press **3** and **CASH** for **FUNCTION KEY**. The **FUNCTION KEY PROGRAM** screen displays:

```
FUNCTION KEY
1. FUNCTION KEY
```

2. From the **FUNCTION KEY** screen, press **2** and **CASH** for **MACRO**. The **MACRO PROGRAM** screen displays:

```
ENTER MACRO KEY
TO BE PROGRAMMED
```

3. Press the macro key (**MACRO1 – MACRO10**) that you wish to program. The screen displays Macro descriptor. Press the **CASH** key to make macro line.

```
MACRO1                                MACRO1
```

4. The screens displays the first macro line:

```
MACRO1
1 :
```

5. Press the first key of the macro sequence, Type up to 50 key stokes. For example, press **5** (numeric five): and **CASH**.

```
MACRO1                                CASH
2 :
```

6. Press the same **MACRO** key to end the sequence.
7. Continue to program additional **MACRO** key sequence or press **CLEAR** key to return to **PROGRAM MODE** screen.

To Remove a Macro

If you wish to remove a key stroke from a macro, replace the current function with the **INACTIVE** function.

NOTE: **PAGE**↑ , **PAGE**↓ , ↑ , ↓ keys are to move menu to menu in X, Z, P, S mode so the Macro Key need to be other places than those(**PAGE**↑ ,**PAGE**↓ , ↑ , ↓).

Options Programming

1. At the **PROGRAM MODE**, press **4** and **CASH** for **OPTIONS** Programming. The **OPTIONS** screen displays:

```
OPTIONS
1. SYSTEM
```

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.

```
OPTIONS
1. SYSTEM
2. PRINT
3. REPORT
4. TAX
5. CURRENCY
6. ROUNDING
7. LOGO
8. KITCHEN PRN
9. BARCODE
10. EJ
11. TRAIN MODE
```

3. Select **PRINT** programming. The **PRINT** screen display:

```
PRINT
1. PRINT DATE
[Y]
```

4. Press the **↑** key and the **↓** key to select option and press the **CASH** key to confirm.
5. Select **PRINT DATE** option.

```
PRINT DATE
Y
```

6. Press the **↑** key for **YES** and the **↓** key for **NO**. Press the **CASH** to confirm the option value and return option screen.

Options - Reference Information

SYSTEM options

Option	Entry	Description
BEEPER ACTIVE	Y or N	Select N for a silent keyboard.
BEEPER ACTIVE IN BATTERY MODE	Y or N	Select N for a silent keyboard and alarm in battery mode.
CLERK ENTRY	PUSH, CODE	Select PUSH for a push button clerk, select CODE for a code entry clerk system (number - clerk or clerk - number - clerk) sequence.
CLERK IS	STAY DOWN, POP-UP	Select Y for pop-up clerks, select N for stay down clerks. With pop-up clerks, you must sign on for each transaction. With stay down clerks, the same clerk remains signed on until sign off.
DECIMAL PLACE	0-3	Enter a digit to place the decimal point the selected number of positions from the right.
DATE FORMAT IS	MMDDYY, DDMMYY, YYMMDD	Select date printing format.
DESC. PGM METHOD	OVERLAY, CODE	When OVERLAY TYPE , program descriptors by pressing the appropriate key on the program overlay. When CODE TYPE , program descriptors by typing the code for each descriptor character.
DRAWER MUST BE SHUT TO SALE	Y or N	Select Y to enforce closed drawer for register operations.
ACTIVATE OPEN DRAWER ALARM	Y or N	Select Y if you want the error tone to automatically sound when the drawer stays open longer than the time set in the following field.
DRAWER OPEN TIME (0-99)	0-99	If you enable the open drawer alarm above, you can set the length of time (1-99 seconds) before the alarm sounds.
ALLOW POST TENDER	Y or N	Select Y to allow re-tendering should a second change calculation should be necessary. Re-enter the tendered amount and press the CASH key to show the new change computation.
OPEN DRAWER ON POST TENDER	Y or N	If you enable post tendering, select N to not open the cash drawer after the second tender.
GLOBAL ENTRY LIMIT (0-14)	0-14	Enter a digit to determine the number of numeric digits that can be entered for any register function. Enter 0 for no limit.

Option	Entry	Description
ALLOW MULTIPLE RECEIPT	Y or N	Set to Y if you wish to issue more than one copy of a transaction receipt.
DEACTIVATE SPLIT PRICING	Y or N	If N , both multiplication and split pricing calculations can be done with the X/TIME key. If Y , only multiplication can be done with the X/TIME key.
ALLOW DIRECT MULTIPLY	Y or N	If Y , you can multiply preset items by simply entering the quantity, then pressing the preset PLU key.
DIRECT MULTIPLY OVER ONE DIGIT	Y or N	If you allow direct multiplication of a preset PLU, you can allow only single digit multiplication or multiplication by more than one digit.
TRIPLE MULTIPLICATION	Y or N	YES allows multiple multiplication, for example, 2 X/TIME, 3 X/TIME, ITEM. Note that multiple multiplication overrides split pricing.
DISPLAY ADD PRICE OF LINKED ITEMS	Y or N	When Y , the customer display shows a total of the item and linked item. For example, if PLU is £1.00 and is linked to PLU2 which is £0.25, the customer display will show £1.25.
PROMPT FOR PRICE IF PRICE=0.00	Y or N	Select Y to allow the operator to enter PLU price of zero price.
COMPULSORY SUBT.BEFORE TENDER	Y or N	Select Y if you want to force the operator to use the SUBTOTAL function before tendering.
ENABLE NOT FOUND PLU	Y or N	Select Y to allow the operator to enter PLU prices and other data when the entered PLU number is not found in the PLU file.
NOT FOUNC PLU TYPE	QUICK FULL	When QUICK , this just asks for the item price and a link PLU. When FULL , this asks for all the PLU details such as descriptor, price, group etc...
NEGATIVE SALE MGR ONLY	Y or N	Select Y if you wish to control negative transactions (when cash is removed from the drawer). When selected mode position must be in the Manager mode to finalize the transaction.
ZERO SALE MGR ONLY	Y or N	Select Y if you wish to control zero transactions (when cash is removed from the drawer). When selected mode position must be in the Manager mode to finalize the transaction.

Option	Entry	Description
MODIFIER:	POP-UP ITEM, POP-UP SALE, STAY DOWN	A MODIFIER key alters the next PLU registered, either by changing the code number of the PLU so that a different item is registered, or by adding the modifier descriptor and not changing the code of the subsequent PLU. If you press a modifier key, you have the option of the modifier applying only to the next item (0), having the same modifier apply to any subsequent item registered in the same transaction (1), or having the same modifier apply to any subsequent item on any subsequent transaction (2).
PRICE LEVEL IS	POP-UP ITEM, POP-UP SALE, STAY DOWN	If you press a price level key, you have the option of the level key applying only to the next item (0), having the same level key apply to any subsequent item registered in the same transaction (1), or having the same level key apply to any subsequent item on any subsequent transaction (2).
HASH IS	NORMAL NON-ADD	NORMAL: Hash adds to all totals except the gross and net sales totals on the financial report. NON-ADD: Hash does not add to any totals, except the HASH total on the financial report.
% IS NOT AFFECT TO NET SALE	Y or N	Select Y not to affect net sale amount.
NOT COUNT IN MEM IN VOID MODE	Y or N	Select Y if you do not wish to count sale data in report memory in VOID mode.
TENDER VALID AMOUNT	AMT OF SALE,, AMT TENDERED	Validation is allowed if an appropriate optional printer is connected to a serial port. Here you can choose the content of single line validation
DISABLE CASH DECLARATION	Y or N	Select Y to block the cash declaration function.
ALLOW SALE WITH ZERO STOCK	Y or N	When N, inventory PLUs cannot be sold when stock reaches "0".
WARNING BELOW MINIMUM STOCK	Y or N	Select Y to display warning message if current stock value is less than minimum stock value.
STOCK PROGRAM BY PC/SD/USB	ADD(+) SUB(-) REPLACE	Choose ADD(+) , SUB(-) or REPLACE to determine whether the quantity of inventory you enter in the PLU stock program adds to existing inventory quantity, or whether it replaces the current inventory quantity.

Option	Entry	Description
USE X/Z/P/S MODE PASSWORD	Y or N	Select Y to be password protected to provide management restriction in X, Z, PROGRAM(P) and SERVICE(S) MODE.
PRINTER PAPER SENSOR ACTIVE	Y or N	A built in paper sensor determines whether paper is currently loaded in the printer. If Y , operations are not allowed without paper loaded. If N , operations are allowed when paper is out.
RS-232C PORT POWER ON	Y or N	Select Y to turn ON the serial port power.
SLEEP MODE TIME SET(SECONDS)	0-240	0: Do not use sleep mode. 1~240: If want to use sleep mode, Please input to this option value for seconds of sleep mode. (BATTERY model only)
STORE NAME	8 Character	Stored files will be saved on SD/USB under a folder with the store name. Do not include spaces between the names.
DRAWER LIMIT	8 DIGIT	You can set a limit for the drawer total. When cash in drawer exceeds the limit you program here, a warning will display on the screen. You must press CLEAR to remove the warning and continue operations. The warning will continue to appear at the completion of every transaction with the limit exceeded, until you use the PAID OUT function to remove cash from the drawer. Set the drawer limit to 0 to disable the drawer limit warning.
CHECK CHANGE LIMIT	8 DIGIT	Use this program to set the maximum amount of cash that can be returned when a check is tendered for an amount greater than the amount of the sale. For example, if the check change limit is £10.00 the maximum amount that can be tendered into the check key on a £5.00 sale is £15.00.
MACHINE NO.	5 DIGIT	The machine number is printed on the register receipt. Program a machine number so that any receipt can be identified with the store or register where the transaction took place.
MODE P/W	6 DIGIT	If you wish to use mode password, you must program a password that you will use to enter X mode, Z mode, PROGRAM(P) mode and SERVICE(S) mode. The password may be up to 6 digits.

Option	Entry	Description
LANGUAGE SELECT	ENGLISH SPANISH GERMAN	Descriptors of menu, system and option can be converted to the selected language automatically. But Descriptors of Report, PLU, Group and etc cannot be converted to the selected language. Those descriptors can be changed only by user programming.

PRINT options

Option	Entry	Description
PRINT DATE	Y or N	Select N if you wish to delete the printing of the date.
PRINT TIME	Y or N	Select N if you wish to delete the printing of the time.
PRINT MACHINE NO.	Y or N	If you are using more than one cash register, you can identify the specific register where a receipt was printed. Enter Y if you wish to print the register number on the receipt.
PRINT CLERK NAME	Y or N	Select N if you wish to delete the printing of the clerk name on the receipt.
PRINT CONSECUTIVE NO.	Y or N	The consecutive number (also referred to as the transaction counter, or receipt counter) normally prints on each receipt. Select N if you do not wish to print this counter.
PRINT SALE ITEM No	Y or N	Select Y if you wish to print a count of the number of items on each receipt.
PRINT PLU # ON RECEIPT	Y or N	If Y , the PLU number and descriptor will print. If N , only the PLU number will print.
USE THOUSAND SEPARATOR	Y or N	Select Y if you wish to use Thousand Separator.
SEPARATOR TYPE	, SPACE .	Choose kind of thousand separator
PRINT RECEIPT WHEN SIGN ON/OFF	Y or N	Select N if you do not wish to print a receipt when signing on or off a clerk.
ALLOW SECOND RECEIPT	Y or N	Set to Y if you wish to issue only one copy of a transaction receipt.
PRINT SUBTOTAL WHEN PRESSED	Y or N	Select Y if you wish the subtotal to print when the SUBTOTAL key is pressed.
PRINT SUBTOTAL WITHOUT TAX	Y or N	If you hand-write credit card slips, you may find it useful to print the merchandise subtotal. Select Y if you wish to print the subtotal without tax on the receipt.

Option	Entry	Description
PRT GROUP TOTAL AFTER TENDER	Y or N	Choose Y if you wish to print group total after tender.
VOLUME UNIT	GAL LTR	If gallonage is selected in PLU programming, choose gallons or liters here.
NOT PRINT IN VOID MODE	Y or N	When in void mode, the message "VOID MODE" normally prints on each receipt. Select N if you wish to delete this message.
SURPRESS BITMAP IN PGM/X/Z	Y or N	Select Y if you do not wish to print Image logo in Program/X/Z mode.
PRE-FEED LINE# RECEIPT (0-5)	0-5	Enter the number of lines you wish to feed before beginning receipt printer print.
POST-FEED LINE# RECEIPT (0-5)	0-5	Enter the number of lines you wish to feed after beginning receipt printer print.
PRT DOUBLE HIGH ALL TOTAL AMT	Y or N	Select Y if you wish to print total amount as double size on the receipt.
CURRENCY LOGO: HOME CONV#1 CONV#2 CONV#3 CONV#4	5 Character	Users can designate a different home currency symbol. To select a different home currency symbol, press the symbol you wish to use on the Alpha Keyboard overlay. If you are using the currency conversion feature, you can select the appropriate symbol for each foreign currency you are accepting. To select a different symbol, press the symbol you wish to use on the Alpha Keyboard overlay.
BOLD DESC. FOR TOTAL/PAYMENT	Y or N	Select Y if you wish to print total descriptor and payment (CASH, CHEQUE, and MISC TEND) descriptor as double size on the receipt.
PRINT QUANTITY ON RECEIPT	Y or N	Select Y if you wish to print quantity of each item on the receipt.

REPORT options

Option	Entry	Description
CASH DECLARATION REQ BEFORE REPORTS	Y or N	Select Y to enforce a cash declaration function before a financial, clerk, or cash in drawer report can be generated.
ONLY ONE X RPT BEF. CASH DECLA	Y or N	Select Y to allow X report only one time before Cash Declaration.
DISABLE X REPORT	Y or N	Select Y to disable X reports.
OPEN DRAWER WHEN REPORTS RUN	Y or N	Select N to stop the drawer from opening when reports are run.

Option	Entry	Description
SURPRESS PRT OF LAST REPT DATE	Y or N	Select Y if you do not want to print last issued date on report.
RESET RECEIPT No AFTER Z FINANCIAL REPORT	Y or N	Select Y if you wish to reset the transaction number (often called the receipt counter) to zero after the financial report is reset.
RESET GRAND TOTAL AFTER Z FINANCIAL REPORT	Y or N	Select Y if you wish to reset the grand total to zero after the financial report is reset.
RESET Z COUNTER AFTER Z1 FINANCIAL REPORT	Y or N	Choose Y or N to determine if you wish to reset the Z counter after a Z1 financial report.
RESET Z COUNTER AFTER Z1 TIME REPORT	Y or N	Choose Y or N to determine if you wish to reset the Z counter after a Z1 time report.
RESET Z COUNTER AFTER Z1 PLU REPORT	Y or N	Choose Y or N to determine if you wish to reset the Z counter after a Z1 PLU report.
RESET Z COUNTER AFTER Z1 CLERK REPORT	Y or N	Choose Y or N to determine if you wish to reset the Z counter after a Z1 clerk report.
RESET Z COUNTER AFTER Z1 GROUP REPORT	Y or N	Choose Y or N to determine if you wish to reset the Z counter after a Z1 group report.
RESET Z COUNTER AFTER Z2 DAILY RPT	Y or N	Choose Y or N to determine if you wish to reset the Z counter after a Z2 of the daily sales report.
RESET ORDER No. AFTER Z1 REPORT	Y or N	Choose Y or N to determine if you wish to reset the Order number after a Z1 of the financial report.
PRINT Z COUNTER ON REPORT	Y or N	Select N if you wish to delete the printing of the reset counter on Z reports.
SKIP ZERO TOTALS ON FINANCIAL REPORT	Y or N	By default, the register prints only totals with information other than zero. Select N , if you wish to print the contents of all the financial report totals, even if the total is zero.
PRINT NEGATIVE ITEM ON REPORT	Y or N	Select N to remove the VOID MODE, RETURN, ERROR CORR and VOID totals from the financial and clerk reports.
PRINT AUDACTION ON FINANCIAL REPORT	Y or N	Select N to remove the AUDACTION total from the financial and clerk reports.
PRINT ON FIN RPT AVG ITEM/CUST	Y or N	Select Y to print the average items per customer (PLU sales counter/Net sales counter).

Option	Entry	Description
PRINT ON FIN RPT AVG £/CUST	Y or N	Select Y to print the average sales per customer (Net Sales/Net Sales counter).
PRINT CLERK REPORT AFTER FINANCIAL REPORT	Y or N	Select Y if you wish to include the clerk report information at the end of the financial report.
PRINT DOUBLE FINANCIAL REPORT	Y or N	Select Y if you wish to print 2 copy financial reports.
PRINT GROSS TOTAL ON X REPORT	Y or N	Select N if you wish to delete the printing of the gross sales total on the X financial report.
PRINT GROSS TOTAL ON Z REPORT	Y or N	Select N if you wish to delete the printing of the gross sales total on the Z financial report.
PRINT GRAND TOTAL ON X REPORT	Y or N	Select N if you wish to delete the printing of the grand total on the X financial report.
PRINT GRAND TOTAL ON Z REPORT	Y or N	Select N if you wish to delete the printing of the grand total on the Z financial report.
GRAND TOTAL IS	GROSS NET	Choose GROSS if you wish the grand total to accumulate daily gross sales totals. Choose NET if you wish the grand total to accumulate daily net sales totals.
SKIP ZERO TOTALS ON CLERK REPORT	Y or N	By default, the register prints only totals with information other than zero. Select N , if you wish to print the contents of all the clerk report totals, even if the total is zero.
PRINT MEDIA TOTALS ON CLERK REPORT	Y or N	Select Y to print media totals for each clerk, thus allowing clerk cash drawer accountability.
SKIP ZERO TOTALS ON PLU REPORT	Y or N	By default, the register prints only totals with information other than zero. Select Y , if you wish to print the contents of the entire PLUs, even if the total is zero.
PRINT PLU # ON PLU REPORT	Y or N	Determines whether PLU# is displayed on the report.
PRINT % OF SALES ON PLU REPORT	Y or N	The register can calculate the percentage of sales represented by each PLU. Select Y if you wish to print this percentage on the PLU report. Note: the percentage will print only on standalone register reports, not IRC report.
PRT PLU BY PRICE LEVEL REPORT	Y or N	Select Y if you wish to print PLU by price level on PLU reports.
ALLOW Z STOCK REPORT	Y or N	When N , the operator is not allowed to clear (Z) stock.
PRINT WHEN POLLING REPORTS	Y or N	Choose N if you would like to suppress register printing when reports are polled.

Option	Entry	Description
PRINT TRAIN TOTAL IN FINANCIAL REPORT	Y or N	Select Y if you wish to print train total on Financial Report.

TAX options

Option	Entry	Description
PRINT TAX SYMBOL	Y or N	Select N to remove the tax symbol (i.e. "T1") from the print and display.
PRINT TAX AMOUNT	Y or N	Select Y if you wish to delete the printing of the tax amount on the receipt.
PRINT TAXABLE TOTAL	Y or N	Select Y if you wish to print the total of merchandise eligible for each tax on the receipt.
PRINT TAX RATE	Y or N	If you are calculating a tax percentage (add-on or VAT), select Y if you wish to print the tax rate on each receipt.
PRINT VAT BREAKDOWN	Y or N	If Y , a breakdown of the VAT eligible sale will print, the net amount and the VAT amount.
TAX AMOUNT IS	ITEM COMB- -INE	Select COMBINE if you are calculating and reporting more than one sales tax rate separately and you wish to print just the total of multiple taxes rather than itemize each tax on the receipt.

CURRENCY options

Option	Entry	Description
PRT EURO AMOUNT TOTAL	Y or N	Select Y to print Euro total on the receipt.
PRT EURO AMOUNT INPUT AMT	Y or N	Select Y to print input amount by Euro on the receipt.
PRT EURO AMOUNT CHANGE	Y or N	Select Y to print change amount by Euro.
BASE CURRENCY	HOME EURO	Choose base currency Home or Euro.

ROUNDING options

Option	Entry	Description																
ROUND TABLE TYPE	ROUND TABLE SWEDISH CANADIAN	Select ROUND TABLE, SWEDISH or CANADIAN to implement the rounding system that you enter on this option.																
ROUND TABLE	2 DIGIT	If you wish to use Round Table system, you must program a Rounding table. The SWEDISH/CANADIAN rounding table is as below. <table border="1"> <thead> <tr> <th>#</th> <th>START</th> <th>END</th> <th>VALUE</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>.00</td> <td>.02</td> <td>.00</td> </tr> <tr> <td>2</td> <td>.03</td> <td>.07</td> <td>.05</td> </tr> <tr> <td>3</td> <td>.08</td> <td>.09</td> <td>.10</td> </tr> </tbody> </table>	#	START	END	VALUE	1	.00	.02	.00	2	.03	.07	.05	3	.08	.09	.10
#	START	END	VALUE															
1	.00	.02	.00															
2	.03	.07	.05															
3	.08	.09	.10															
ALLOW ROUND ON SUBT	Y or N	Select Y you wish to allow rounding when press SUBTOTAL key.																
ALLOW ROUND ON CASH	Y or N	Select Y you wish to allow rounding when press CASH key.																
% AND TAX ROUNDING	ROUND UP 0.005, ROUND UP, ROUND DOWN	Select the digit that represents the appropriate rounding method for tax and discount calculations.																
SPLIT PRICE ROUNDING	ROUND UP 0.005, ROUND UP, ROUND DOWN	Select the digit that represents the appropriate rounding method for split pricing (i.e. 2 at 3 for £1.00) calculations.																

LOGO options

Option	Entry	Description
PRINT PREAMBLE MESSAGE IN RCPT	Y or N	Choose whether to print the PREAMBLE on the receipt.
PRINT POSTAMBLE MESSAGE IN RCPT	Y or N	Choose whether to print the POSTAMBLE on the receipt.
PRINT PREAMBLE IMG IN RCPT	Y or N	Choose whether to print the PRE-GRAPHIC LOGO on the receipt.
PRINT POSTAMBLE IMG IN RCPT	Y or N	Choose whether to print the POST-GRAPHIC LOGO on the receipt.
PREAMBLE IMAGE NO. ON RCPT	0-20	Choose pre- image no to print on the receipt.

Option	Entry	Description
POSTAMBLE IMAGE NO. ON RCPT	0-20	Choose post-image no to print on the receipt.
PRINT PRE MESSAGE ON ORDER IN RCPT	Y or N	Choose whether to print the PREAMBLE on the internal order receipt.
PRINT PRE IMG ON ORDER IN RCPT	Y or N	Choose whether to print the PREAMBLE LOGO on the internal order receipt.

KITCHEN PRINTER options

Option	Entry	Description
PRINT KP ORDER # ON RECEIPT	Y or N	A system wide counter creates an order number for each kitchen requisition. Choose Y or N to print the order number on the kitchen printer requisition.
PRINT PRICE ON KP	Y or N	You can choose to print the item with or without its' price on the kitchen requisition.
SEND TO KP IN VOID MODE	Y or N	You can choose whether to print or not print registrations in void mode on kitchen requisitions.
SEND ORDER TO KP AT SUBTOTAL	Y or N	Choose Y to print orders on the KP when the SUBTOTAL key is pressed. Choose N to print orders on the KP when the order is finalized.
COMBINE LIKE ITEMS ON KP	Y or N	If two of the same items are registered in the same transaction, you can choose the format on the kitchen requisition. For example, if Y , "2 HAMBURGERS; if N , "1 HAMBURGER" and "1 HAMBURGER".
PRIORITY PRINT BY GROUP ON KP	Y or N	If Y , the order in which items appear on a kitchen requisition is determined by the group to which the item is assigned, i.e. items reported to group 1 will print before items reported to group 2.
PRT GROUP DETAIL ON KP	Y or N	Select Y to print Group detail on the order receipt.
TWO LINE PRINT ON KP	Y or N	Choose Y to print two lines on Kitchen printer.
PRINT PLU NUMBER ON KP	Y or N	Select Y to print PLU number on the order receipt.
PRINT TOTAL AMT OF PLU ON KP	Y or N	Select Y to print total amount of PLU on kitchen printer.
KP START NO.	6 DIGIT	If you wish to modify, the KP start number can be programed up to 6 digits.

BARCODE options

Option	Entry	Description
BARCODE TYPE	NONE PRICE WEIGHT	Select bar code type.
LENGTH OF FIELD1 PLU CODE	4-6	Select length of PLU code.
LENGTH OF PRICE OR WEIGHT	4-6	Select length of price or weight.
DECIMAL NUM. FOR WEIGHT	0-3	Select decimal number of weight.
BAR WEIGHT TYPE	LB KG OZ	Choose weight type.

EJ options

Option	Entry	Description
ELECTRONIC JOURNAL ENABLE	Y or N	Select Y to enable the electronic journal. The electronic journal captures in memory what you would print line by line on a traditional journal. The four options that follow control the electronic journal feature. The electronic journal can be printed in the REPORT MODE reset in the Z MODE .
PROMPT WHEN E.J. BUFFER IS FULL	Y or N	If the electronic journal is enabled above, select Y if you wish to display a message to notify the operator when the journal memory is full.
STOP OPERATIONS WHEN E.J. BUFFER IS FULL	Y or N	If the electronic journal is enabled above, select Y if you wish to stop operations when the journal memory is full.
SEND ONLY NEGATIVE ENTRIES TO E.J.	Y or N	If the electronic journal is enabled above, select Y if you wish to capture only transactions with negative entries.
SEND RESET REPORT TO E.J	Y or N	If the electronic journal is enabled above, select Y if you wish to capture reset reports.
E.J PRINTING	NEW OLD	NEW: Prints electronic journal from lowest consecutive number to highest. OLD: Prints electronic journal from highest consecutive number to lowest.
E.J PORT (0-2)	0-2	Choose a port for a remote printer to print electronic journal reports instead of the register printer.

Option	Entry	Description
PRINT SMALL FONT EJ REPORT	Y or N	Select Y to print small font on EJ report.

TRAIN MODE options

Option	Entry	Description
OPEN DRAWER IN TRAIN MODE	Y or N	Select N if you do not want the cash drawer to open during training mode operations.
PRINT TRAIN MODE TITLE	Y or N	When in training mode, the message "TRAIN MODE" normally prints on each receipt. Select N if you wish to delete this message.
SEND TO KP IN TRAIN MODE	Y or N	You can choose whether to print or not print registrations in training mode on kitchen requisitions.
TRAIN P/W	6 DIGIT	If you wish to use training mode, you must program a password that you will use to enter training mode. The password may be up to 6 digits.
PRT TRAIN CLERK START/END MESSAGE	Y or N	Select N if you do not wish to print a message of train clerk start or end.

Employee Programming

1. At the **PROGRAM MODE** menu, press **5** and **CASH** for **EMPLOYEE**. The **CLERK NUMBER** screen displays:

ENTER CLERK # (1-10) 0
--

2. Press the clerk number and **CASH**.
3. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm. Select the Employee option you wish to program.
4. Press the **↑** key for **YES** and the **↓** key for **NO**. Press the **CASH** to confirm the option value and return previous screen.
5. Press the **CLEAR** key to finalize and return to the **ENTER CLERK#** screen.

Clerk Programming - Reference Information

Option	Entry	Description
NAME	Alpha numeric 16 character	You can program a descriptor for each clerk. The name you program will print on the receipt in place of the default CLERK #1-99. Type the descriptor using the Program Overlay or by using the descriptor code method (see page 102.) The overlay is automatically activated when the cursor is pointing at the DESC field.
PASSWORD	6 digit number	If you are using a direct or code entry clerk system. The number you set here is the number you must use to sign on or clock in/out. If using an optional card reader, you must swipe the employee card at this field.
TRAIN CLERK	Y or N	Set to Y if you wish to be train clerk.
ALLOW X REPORTS	Y or N	If Y , you can use X Reports menu.
ALLOW Z MODE	Y or N	If Y , you can use Z mode.
ALLOW P MODE	Y or N	If Y , you can use P mode.
ALLOW S MODE	Y or N	If Y , you can use S mode.
ALLOW VOID MODE	Y or N	If Y , you can use VOID mode.

Time

Time & Date

Use this program to set the clock and calendar on your ER-230EJ. The date changes automatically. After initial setting, time changing will probably be required only for beginning and ending daylight savings time.

1. From the **PROGRAM MODE** menu, press **6** and **CASH** for **TIME**. Press **1** and **CASH** for **TIME/DATE**. The **SET TIME/DATE** screen displays:

TIME :	HH : MM
(24 : 00)	12 : 00

2. Type the current time in 24-hour format (i.e. military time, where 13:00 is 1:00 PM.) Press the **CASH**.
3. Type the current date in MM (month) DD (day) and YY (year) format. Press the **CASH**.

Time Schedule

1. From the **PROGRAM MODE** menu, press **6** and **CASH** for **TIME**. Press **2** and **CASH** for **TIME SCHEDULE**. The **TIME SCHEDULE** screen displays:

TIME SCHEDULE
1. PRICE LEVEL2

2. Select menu to program time schedule. For example, if you press **1** and **CASH** for **PRICE LEVEL2**. Time schedule program screen display:

PRICE LEVEL2
1. START TIME [99 : 99]

3. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm.
4. From the YES/No type option screen, Press the **↑** key for YES and the **↓** key for NO. Press the **CASH** to confirm the option value.
5. If you terminate Time Schedule program, press **CLEAR** key.

Taxes Programming

The ER-230EJ allows three calculation options for each of the four possible taxes.

- Add-On - most sales taxes can be programmed by entering an *add-on* tax percentage rate.
- VAT - if tax is included in the cost of the item, you can use value added tax (*VAT*) to calculate the tax share of each sale.
- A fourth tax programming option, for the Canadian Goods and Services tax (*GST*) can be set using tax rate 4.

Important Note: After you have entered your tax program, test for accuracy by entering several transactions of different dollar amounts. Carefully check to make sure the tax charged by the cash register matches the tax amounts on the printed tax chart for your area. As a merchant, you are responsible for accurate tax collection. If the cash register is not calculating tax accurately, or if you cannot program your tax properly from the information in this manual, contact your Dealer for assistance.

Programming an Add-On Tax Rate Percentage

When tax requirements can be met using a straight percentage rate, use the following method to program a tax as a straight percentage.

1. Press **6 MODE** to select the **PROGRAM MODE**.
2. From the **PROGRAM MODE** menu, press **7** and **CASH** to view the **TAXES** screen:

ENTER TAX#	
(1-4)	0

3. Enter the Tax number and press the **CASH** key to confirm.

TAXES	
1. DESC :	[TAX1]
2. TYPE	[ADD-ON]
3. RATE	[0.000]

4. At the TYPE field, press the **↑** key and the **↓** key to select the ADD-ON and press the **CASH** key to confirm.
5. At the RATE field, input the tax rate and press the **CASH** key to confirm.
Enter the percentage rate for the sales tax. For example if the tax is 6 percent, enter 6000. Press **CASH** to set the rate.
6. Continue to program additional taxes or press **CLEAR** to return to the **PROGRAM MODE** screen.

Programming a VAT (Value Added Tax)

When a tax is included in the cost of the item, you can use the value added tax (VAT) program to calculate the tax share of each sale.

1. Press **6 MODE** to select the **PROGRAM MODE**.
2. From the **PROGRAM MODE** menu, press **7** and **CASH** to view the TAXES screen:

ENTER TAX# (1-4) 0
--

3. Enter the Tax number and press the **CASH** key to confirm.

TAXES	
1. DESC :	[TAX2]
2. TYPE	[VAT]
3. RATE	[0.000]

4. At the TYPE field, press the **↑** key and the **↓** key to select VAT and press the **CASH** key to confirm.
5. At the RATE field, input the tax rate and press the **CASH** key to confirm.
Enter the percentage rate for the sales tax. For example if the tax is 6 percent, enter 6000. Press **CASH** to set the rate.
6. Continue to program additional taxes or press **CLEAR** to return to the **PROGRAM MODE** screen.

Programming a Canadian GST

Tax 4 can be programmed to accommodate the Canadian Goods and Services tax (GST).

1. Press **6 MODE** to select the **PROGRAM MODE**.
2. From the **PROGRAM MODE** menu, press **7** and **CASH** to view the **TAXES** screen:

ENTER TAX#	
(1-4)	0

3. Enter the Tax number and press the **CASH** key to confirm.

TAXES		
1. DESC :		[TAX4]
2. TYPE		[ADDON]
3. RATE		[0.000]
4. GST IS BY TAXRATE1	[N]	
5. GST IS BY TAXRATE2	[N]	
6. GST IS BY TAXRATE3	[N]	

4. At the TYPE field, press the **↑** key and the **↓** key and press the **CASH** key to confirm.
5. At the RATE field, input the GST rate and press the **CASH** key to confirm.
Enter the percentage rate for the sales tax. For example if the tax is 6 percent, enter 6000. Press **CASH** to set the rate.
6. At the GST IS BY TAX1 field, if the GST is taxable by rate1 (tax on tax) by pressing the **↑** key and the **↓** key, the pressing the **CASH** key
7. Continue to program additional taxes or press **CLEAR** to return to the **PROGRAM MODE** screen.

Messages

From the **PROGRAM MODE**, press **8** and the **CASH** key for **MESSAGES**. The **MESSAGES** screen displays:

MESSAGES 1 . PREAMBLE

Preamble

The preamble is a programming message of up to six lines that appears at the top of each receipt.

1. From the **MESSAGES** screen, press **1** and **CASH** to display the **PREAMBLE** screen:

PREAMBLE 1 . YOUR RECEIPT

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm. Select the Preamble line you wish to program.
3. Continue to program additional Preamble or press **CLEAR** to return to the **PROGRAM MODE** screen.

Postamble

The postamble is a programming message of up to six lines that appears at the bottom of each receipt.

1. From the **MESSAGES** screen, press **2** and **CASH** to display the **POSTAMBLE** screen:

POSTAMBLE 1 . NO DATA

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm. Select the Postamble line you wish to program.
3. Continue to program additional Postamble or press **CLEAR**.

Financial Report

The Financial Report selection allows you to reprogram the descriptors that appear with the Financial Report totals and counters. For example, the first total on the financial report "+PLU TTL" represents the total of all positive PLU entries. You might want to re-label this total to say "ADJST TTL". You can reprogram any of the Financial Report totals listed here with any 24-character descriptor.

1. From the **MESSAGES** screen, press **3** and **CASH** to display the **FINANCIAL REP MSG**. Screen:

```
FINANCIAL RPT
1. +PLU TTL
```

2. Press the **↑** key and the **↓** key to select line and press the **CASH** key to confirm. Select the Financial Report line you wish to program.
3. After you have completed typing the descriptor, press **CASH** to accept the new message.
4. Continue to program additional Report message or press **CLEAR** to return to the **PROGRAM MODE** screen.

Clerk Report

The Clerk Report selection allows you to reprogram the descriptors that appear with the Clerk Report totals and counters. For example, the first total on the clerk report "NET SALES" might be re-labeled to say "GROSS SALES". You can reprogram any of the Financial Report totals listed here with any 24-character descriptor.

1. From the **MESSAGES** screen, press **4** and **CASH** to display the **CLERK REP MSG**. Screen:

```
CLERK RPT
1. NET SALE
```

2. Press the **↑** key and the **↓** key to select line and press the **CASH** key to confirm. Select the Financial Report line you wish to program.
3. After you have completed typing the descriptor, press **CASH** to accept the new message.
4. Continue to program additional Report message or press **CLEAR** to return to the **PROGRAM MODE** screen.

Mix & Match Program

Retailers often offer discounts when multiples of different items are purchased. For example, the offer: “save £5 on any three bottles of wine” can be handled by a mix and match discount. The ER-230EJ can accommodate up to 99 (the exact number is determined by memory allocation) different mix and match discounts.

This program sets the number of items that must be purchased to receive the discount and the amount of the discount. You must also set the following additional Mix & Match Table options that are set through separate programs:

- You can set a 24 character descriptor for the discount
- You must link eligible items to the appropriate mix and match table. See “PLU Programming” in “Program Mode ” and go to Page 107 of the PLU options.

Mix & Match Name/Quantity/Price Settings

Each Mix & Match discount function can be programmed with a unique 24-character descriptor. The number of Mix & Match discounts is set in memory allocation.

1. From the **PROGRAM MODE** screen, press **9** and **CASH** to display the **MIX & MATCH PGM** Screen:

ENTER MIX&MATCH#	
(1-20)	0

2. Enter the number of mix and match.

MIX & MATCH	
1. DESC:	[DISCOUNT01]
2. QUANTITY	[0]
3. AMOUNT	[0.00]

3. The descriptor of Mix and match can be up to 24 characters. Press the **CASH** key.
4. At the **QUANTITY** field, enter the number of items that need to be purchased to qualify for the discount.
5. At the **AMOUNT** field, enter the amount of the discount.
6. Press the **CASH** key to view the **MIX & MATCH PGM** screen or press the **CLEAR** to exit.

Program Scans

You can make a printed record of your ER-230EJ program.

1. From the **PROGRAM MODE** menu, press **10** and **CASH** for **PGM SCAN**. The **PROGRAM SCAN** screen displays:

```
PGM SCAN
1. PLU
```

```
PGM SCAN
1. PLU
2. GROUP
3. FUNCTION KEY
4. OPTIONS
5. EMPLOYEE
6. TIME SCHEDULE
7. TAX
8. MESSAGES
9. MIX & MATCH
10. NLU CODE#
11. MACRO
```

2. Press the **↑** key and the **↓** key to select menu and press the **CASH** key to confirm. Select the **PGM SCAN**.

Glossary

Activity Count

The activity counter increments each time an entry is made on a particular PLU, or function key. The counter prints on the appropriate reports.

Cancel

Press the CANCEL function to abort a transaction in progress. All current items are removed (voided).

Cash Declaration

This option forces the operator to count the cash drawer and input the results before the financial report can be taken. Absentee owners may want clerks or managers to declare the drawer counts to insure that all cash is deposited, regardless of overages, or shortages. As an added benefit, the overage or shortage amount is calculated and printed on the financial report.

Clerk

Sales clerks are individuals who are responsible for selling the merchandise to the customer. Typically, management wants to know merchandise sales levels for each clerk, in order to monitor productivity, account for cash and other media, and/or pay commissions. The default program provides operation for 15 clerks, however up to 99 different clerks can be used by changing the default memory allocation.

Compulsory

When an operation is programmed compulsory, the appropriate entry must be performed in order to complete the operation.

Compulsory Amount Tendering

This forces the operator to input the tender, rather than pressing a payment key directly. The change will always be computed by the register when a customer tenders an amount greater than the total due. Compulsory tendering will reduce cashier change errors.

Compulsory Condiment

When a kitchen printer, or requisition system is used, the merchant may wish to force the entry of a condiment or instruction for specific items. If compulsory condiment status is set for a specific PLU, then a condiment PLU must follow the entry of the item.

Compulsory Drawer

With compulsory drawer enabled, the clerk cannot begin a new transaction until the drawer is closed. This simple feature was designed to teach cashiers the habit of closing the cash drawer after each transaction. You'll reduce potential errors, theft and fraud that can take place when your cashier works out of an open drawer.

Compulsory Number Entry

This option forces the operator to enter a reference number (using the #/NS key) before a PLU entry can be made or a transaction finalized with a Charge key. The number could represent an SKU number that would be tracked manually, or other data such as a customer count.

Consecutive Number

A sequential number is printed on each receipt issued. This is not a "customer count" as this number is incremented for non-sales activity such as no-sales and reports. A count of revenue generating transactions (true customer count) is printed with the Net Sales total on the financial report.

Currency Conversion

Use the currency conversion function to convert and display the value of the transaction in foreign currency. Only cash tender is allowed after pressing the currency conversion function. Change is calculated and issued in home currency.

Decimal Multiplication

If you sell weighed goods, yard goods, or any merchandise sold in fractions of a unit, the decimal multiplication feature calculates each transaction quickly and accurately. For example, if your customer selects 4.75 pounds of an item sold at £1.59 per pound, you enter 4.75 on the numeric keypad, press the X/TIME (multiplication) key, then enter the price per pound and press the appropriate PLU key.

Default Program

The default program is the original program installed in the ER-230EJ. The register has a default program which makes it operational after a memory clear. Nearly all options, rates and status programs are set to zero as the default condition.

Department

The ER-230EJ uses price look-ups (PLUs) to perform the function of traditional cash register departments. PLUs may be registered directly on the keyboard (like traditional departments) or indirectly by entering the item or PLU number and then pressing the PLU key.

Electronic Journal

The ER-230EJ provides a traditional journal printer. For business records, a copy of daily financial summaries is usually all that is needed. Like some of the more expensive POS systems, the SAM4S ER-230EJ has the capability of storing a sales journal in memory. The electronic journal can be reviewed and discarded, saved to an SD card or polled by a PC for archival. When ECR memory reserved for electronic journal is full, current records are saved and old data is discarded.

Error Condition

An error condition signals that mis-operation has occurred. It is identified by an audible tone and an error descriptor appearing on the display.

Error Correct

An error correct operation voids the last item entered, it must be used within a sale.

Flash ROM

Flash ROM is used by the manufacturer to contain the program that runs the register. Flash ROMs maintain memory when power is off, allowing the register to be especially stable and reliable. When the register's program is improved, or updated, the Flash ROM can be updated by a qualified service technician through a utility in the register.

Groups (PLU Groups)

Groups are used to organize sets of items. For example, in a restaurant Grill Items, Drinks, and Ice Cream items might be separated into different groups. Up to 99 group totals are available. Group reporting is available on the group report.

HALO

The high amount lock-out (HALO) limits the amount allowed to be entered in a PLU, or function key.

HASH

Merchants often sell non-merchandise items, such as lottery tickets, or bottle deposits, that they do not wish to account for as reportable revenue. HASH PLUs are useful to account for non-revenue income. They will add to the appropriate totals on the PLU report, they will add to the transaction totals, and they will be accountable for in drawer totals, but they will not affect the merchants, NET SALES, GROSS SALES or NON-RESETTABLE GRAND TOTAL. As a system of options programming, HASH can be defined to not add to the transaction (NON-ADD).

Link (PLU Link)

Use linked PLUs if you wish the registration a PLU to automatically cause the registration of another PLU (for example to automatically add a bottle deposit.) Linked PLUs are set with Program 350, PLU Link programming.

Macro

Macro keys may be programmed to record, and then later perform, up to 50 keystrokes.

For example, a macro key could be set to tender (preset tender) a common currency, such as £5 into the cash key.

Memory Allocation

Memory allocation is a program that determines how the system memory is divided to provide the correct features for your application. For example, you may require more or less clerk memory, PLUs, or electronic journal memory. Memory allocation allows you to maximize the features you need while minimizing the features you do not need.

Mix & Match

Retailers often offer discounts when multiples of different items are purchased. For example, the offer: “save £5 on any three bottles of wine” can be handled by a mix and match discount. The default ER-230EJ can accommodate up to 10 different mix and match discounts, the total can be increased to a maximum of 100 through memory allocation.

Multiple Receipts

In some cases, for example where a mail-in rebate is offered, an extra copy of a receipt is needed. If allowed, the receipt must be re-printed immediately, before another transaction is started.

Negative PLUs

As you program PLUs, you will find a setting to make them negative (normally they are positive). Positive PLUs are used for items that add to the sale. Negative PLUs are used for items that subtract from a sale, like individual store coupons or bottle deposit credits.

NLU

Number Look-Up (NLU) refers to PLU code that is accessed when a Keyboard PLU is used. In the default program each Keyboard PLU will look up the appropriate numeric PLU, beginning with PLU #1 for Keyboard PLU key #1 and continuing sequentially through the keyboard.

However, this numbering sequence may be impractical for some applications. For example, Keyboard PLU #1 may represent a can of *Diet Pepsi*. The merchant may wish to have the Keyboard PLU look up the UPC code number for *Diet Pepsi*, which is “120500”. Using this program you can change the Number Look-Up (NLU) for the keyboard PLU to any 14-digit number you choose.

No Sale

No sale is an operation to simply open the cash drawer. No sales are counted and reported on the financial report.

Not Found PLU

For small merchants, the ER-230EJ can build a PLU file “on the fly”. Each time an item is scanned (or entered by PLU number) that is not in the PLU file, the operator is prompted to enter the price and other options for the item. At the end of the day, the “Not Found PLU Report” will allow the manager to verify the prices and update the PLU file as needed.

Open (PLU)

Open PLUs accepts price entries, rather than register a preset price. To prevent errors, you may set a high limit (HALO) for open entries.

Override

Override is an operation used to bypass a programmed price or entry limit (HALO).

Over-Tendering/Under-Tendering

When a payment is made less than the amount due, it is called an under-tender. After an under-tender, the register calculates and displays the remaining balance for the sale.

Additional payments must be made until the total due is satisfied. When the sale is fully paid, the cash drawer will then open and the receipt is completed. When a payment is made more than the amount due, it is called an over-tender. The register will compute and display the change due and the receipt will be completed. Note that register options can be set to allow or disallow over-tendering for check and charge payments.

Paid Out

The Paid Out key is used to track cash paid out of the cash drawer or to record pick ups from the cash drawer.

PLUs

Price look-ups (PLUs) are accessed by indexing a code number and pressing the PLU key, or by pressing a keyboard PLU key. PLUs can be programmed with a preset or open price. PLUs record an activity count and dollar total on the PLU report. PLU sales may also report to a group.

Post Tender

Post tendering is available to help prevent cashier confusion when a customer decides to change the tender amount. When Post Tendering is allowed, the operator can re-enter a cash tender and the register will re-calculate the change.

To post tender after finalizing the sale, enter the cash amount presented by the customer and then press CASH. The amount of change due to the customer is then displayed. This is a calculation function only, and no totals or counters are updated by the use of this feature.

Preamble/Postamble Message

Programmable messages allow each merchant to customize his receipt with the store name, address, phone number, website or other critical identification information or advertising messages. The SAM4S ER-230EJ allows a preamble message of up to six lines, each with up to 32-characters, to be printed at the top of each receipt. A postamble of up to 6-lines of 32-characters can also be printed at the bottom of the receipt.

Preset (PLU)

When a PLU is pre-programmed or pre-set with a fixed amount, the preset amount will automatically register when the PLU is pressed or entered.

Preset Override

When a PLU is preset, it is possible to override the preset price with a different price. If the override function is set to be allowed in the PLU program, you can simply enter a new price and press the PLU key.

Receipt

A receipt is a printed tape given to a customer as a record of the sale transaction.

Received on Account

The Received on Account key is used to track cash received into the cash drawer or to record loans to the cash drawer.

Register Number

The number of the register can be set and printed on each receipt. If the merchant uses more than one register, or has more than one location, the register where a transaction took place or report was taken is easily identified.

Single Item

The transaction is finalized automatically when a single item PLU is registered as the first item in a sale. Single item status is used to speed transaction entry when an item is normally sold in a one-item sale, for example, a pack of cigarettes, a newspaper or an admission ticket.

Split Pricing

Often merchants price items in multiples, for example 3 for £1. The register will compute the price of items when the exact quantity is not purchased. If the customer chooses to buy 2 items at 3 for £1, enter 2, press the X/TIME key, enter 3, press the X/TIME key and then enter the price and the PLU. The register will compute the price for the items purchased.

Stock (PLU Stock)

Each PLU reports an activity counter. Normally the activity counter increments (adds) and is reset when a PLU Z-report is taken. You can choose to use the PLU activity counter as a stock counter. If used as a stock counter, each PLU activity will reduce the count. A separate program allows you to add to the stock count or enter a new stock count. Stock counts are not reset when PLU Z-reports are taken.

Surcharge (Item)

An item percent surcharge adds a percentage to the price of an item. This addition nets the PLU total.

Surcharge (Sale)

A sale percent surcharge adds a percentage to the entire sale.

Tax Computation by Rate/Tax Computation by Table

In the simplest method of tax calculation, the register is set with a tax rate (or rates) and the taxes are computed by a percentage calculation. In some cases, a tax that is entered as a percentage does not follow exactly the tax charts that apply in your area (even if the tax chart is based on a percentage). In these cases, we recommend that you enter your tax using tax table programming. This method will match tax collection exactly to the break points of your tax table.

Tax Exempt

Tax exempt is used to exclude the tax from an entire sale.

Tax Shift

Tax shift keys are used to reverse the tax status of a PLU entry.

Tender

A tender is the register operation in which the amount of the payment is entered. If the tender exceeds the amount due, the sale is finalized and change due is displayed.

Training Operation

Training operations do not add to PLU or function key totals. This allows an operator to practice making entries without updating sales totals. If you wish to perform training operations, designate one of the clerks for training. You must clear (Z) the register before the training clerk can be used. When that clerk is signed on, the register is in “training mode”.

Transaction Number

See consecutive number.

VAT

Value-Added Tax (VAT) is a tax collection system where a portion of the item’s sale price is tax. VAT is different than most sales taxes where tax amounts are calculated and added-on to the sale. Value added taxes are included in the item price.

Void

A void operation will erase a previous item entry. It must be used inside of a sale only.

X & Z Reports

X (eXamine) reads reports without resetting and Z (Zero) reads and resets your sales totals.
