Units: mm

Mounted Dimensions

For dimensions of the Floor Stand in relation to the KIOSK01 when mounted, refer to the drawings below.

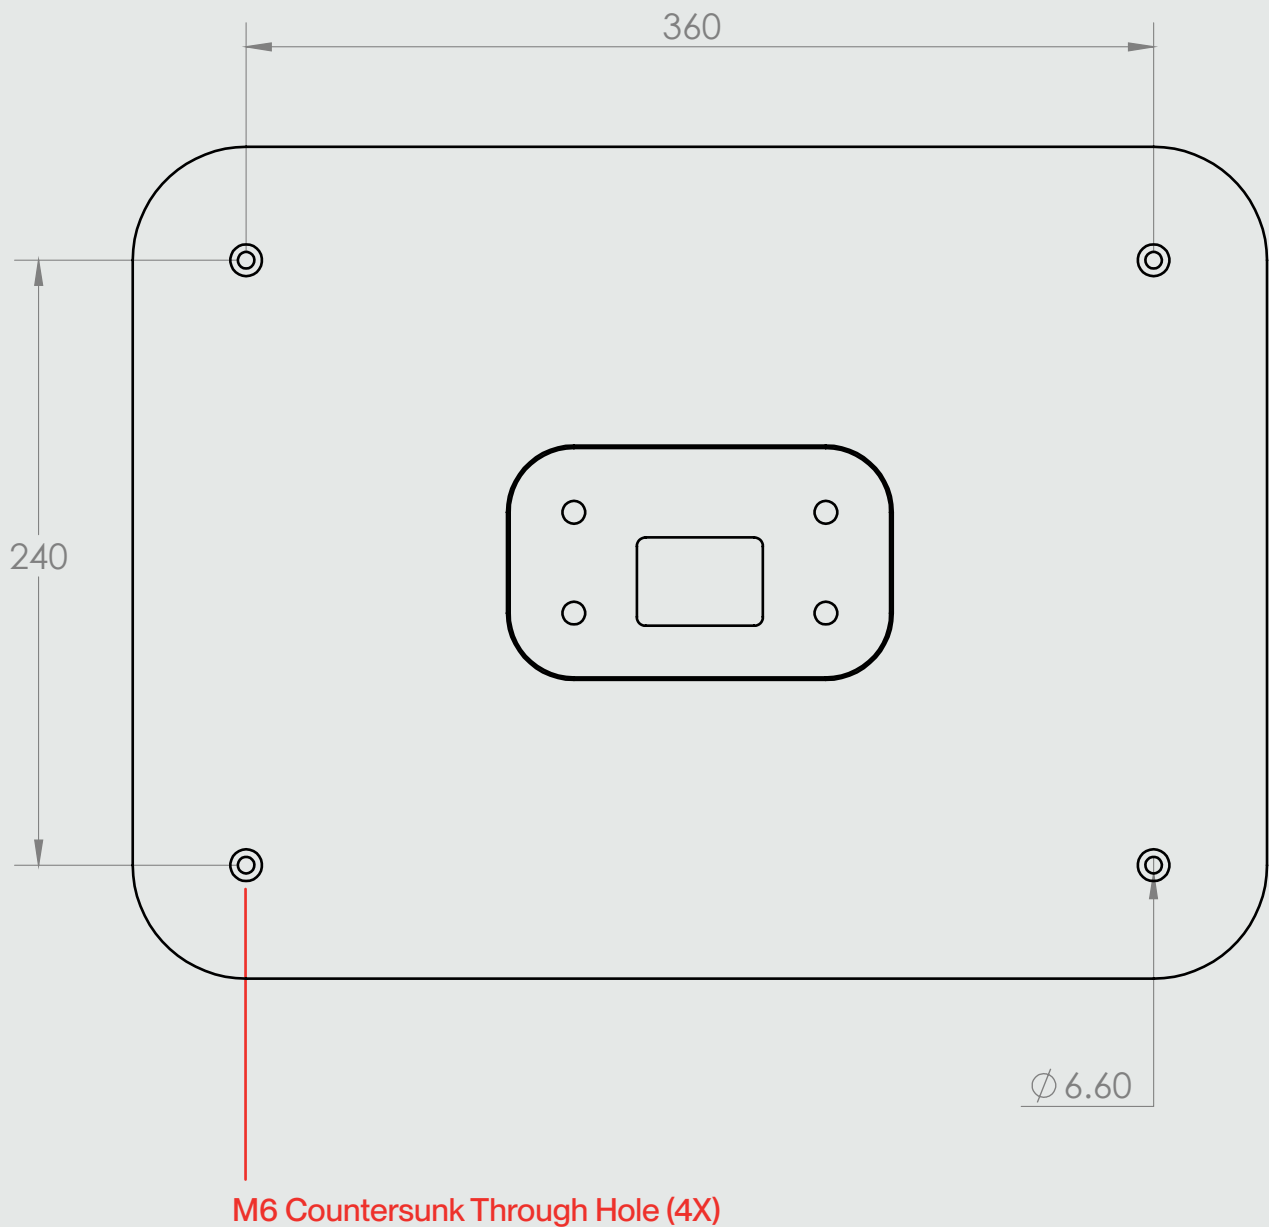

Units: mm

Base Dimensions

To secure the Floor Stand to a chosen surface, use the drawing below.

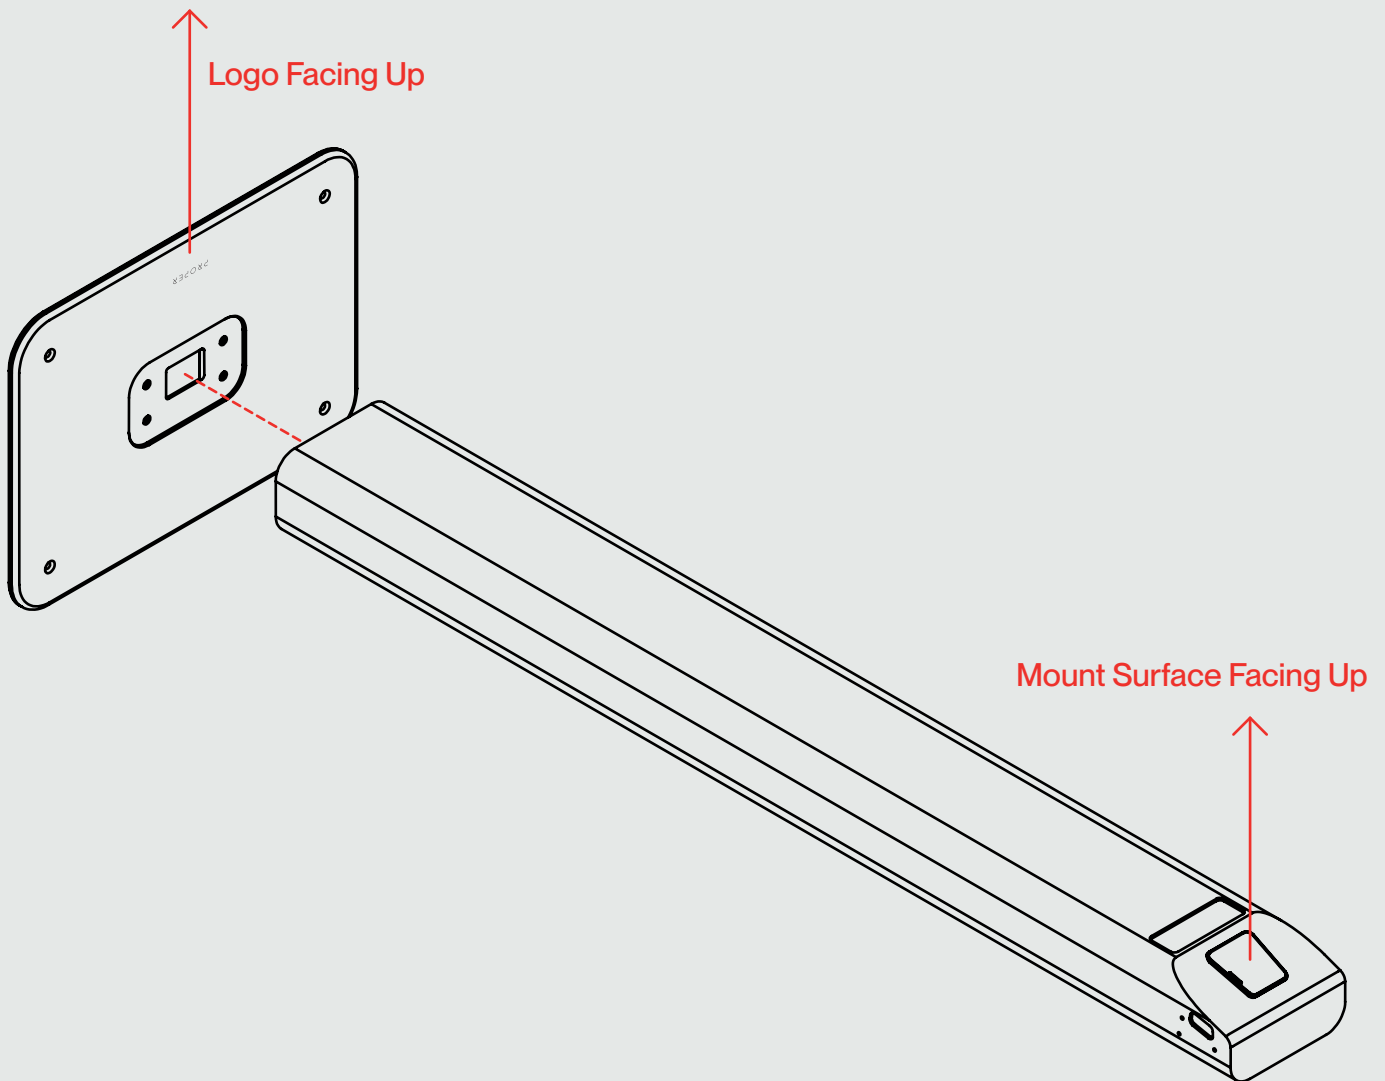

Units: mm

Instructions

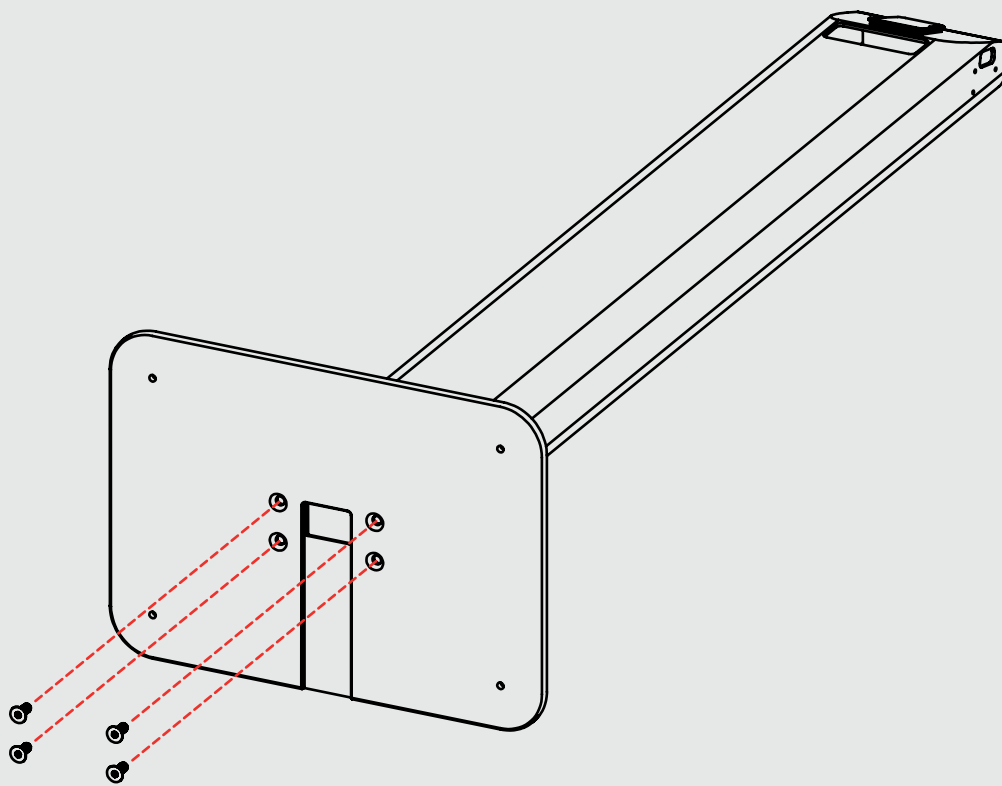

Step 1:

To assemble the Floor Stand, begin by slotting the frame into the recess of the base. Make sure that the Proper logo is facing forward in the direction of the mount surface as shown in the drawings below.

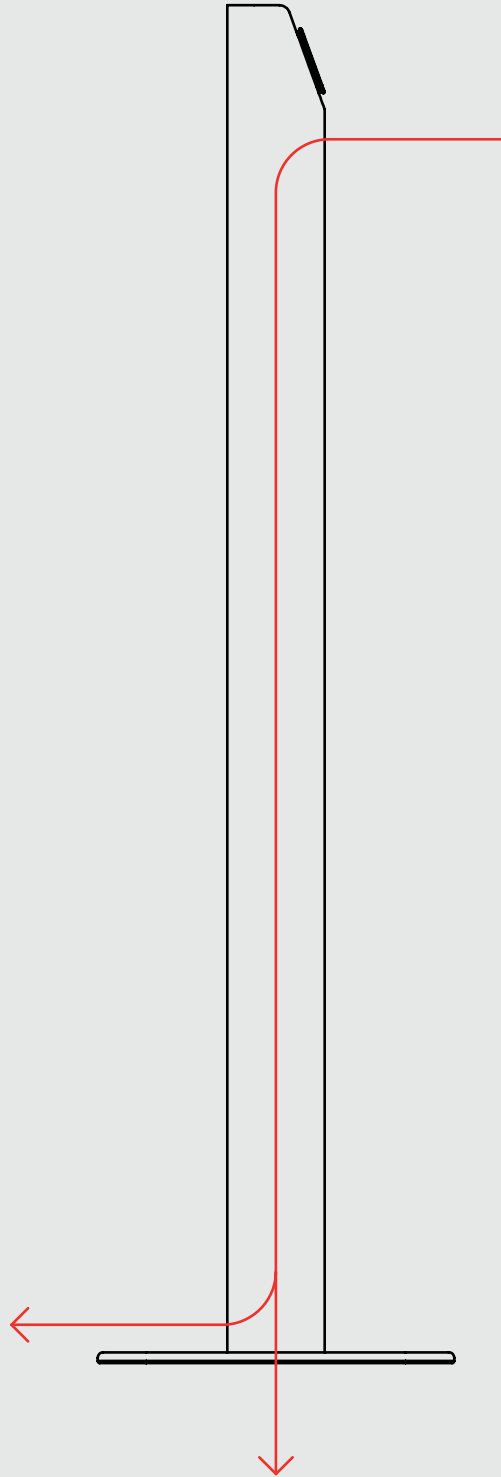

Step 2:

Use the four M8 fasteners and secure the frame to the base from underneath. When secure, stand the Floor Stand upright and wiggle to confirm stability.

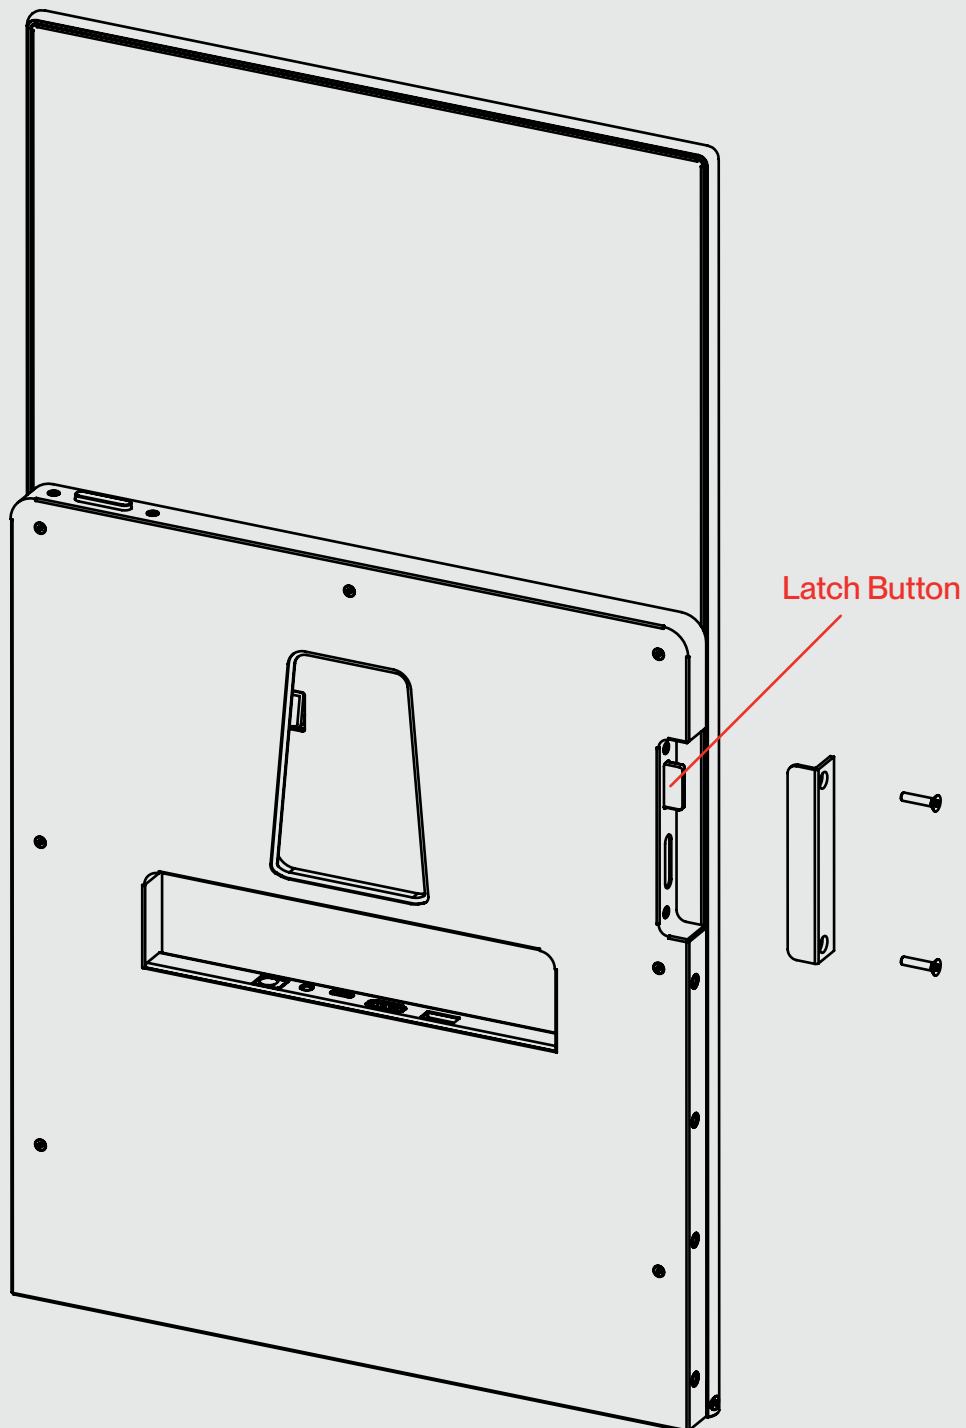

Step 3:

Before mounting the KIOSK01 to the Floor Stand, route all cables through the stand to ensure a seamless install. Use the opening on the front to feed cables in. Use either of the two cable exits located at the base to pull cables through. Once routed, plug the cables into the KIOSK01.

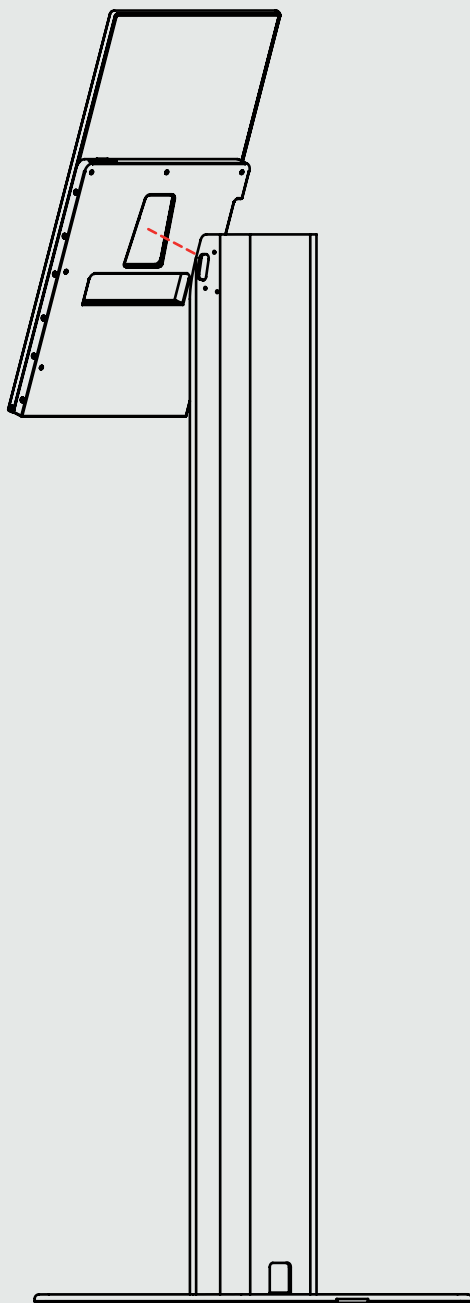

Step 4:

To mount the KIOSK01 to the Floor Stand, remove the two fasteners and latch cover located on the side of the KIOSK01 exposing the latch button.

Step 5:

Begin by carefully aligning the KIOSK01 rear mount opening to the protrusion on the Floor Stand as shown below.

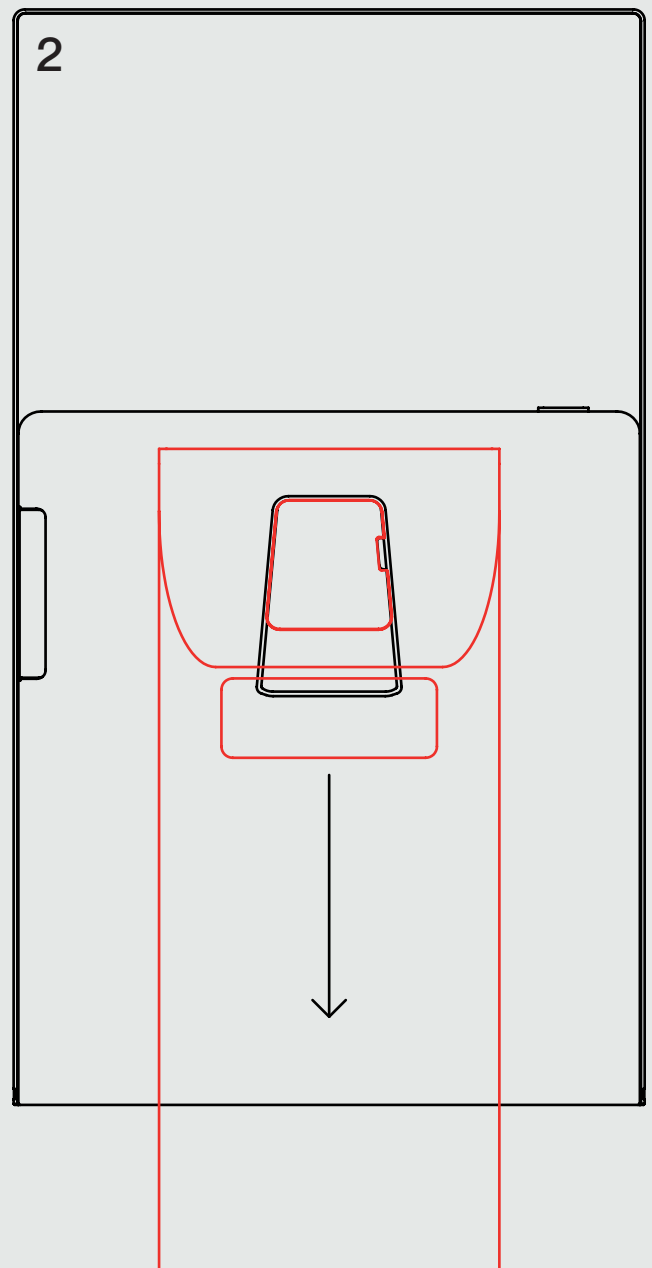

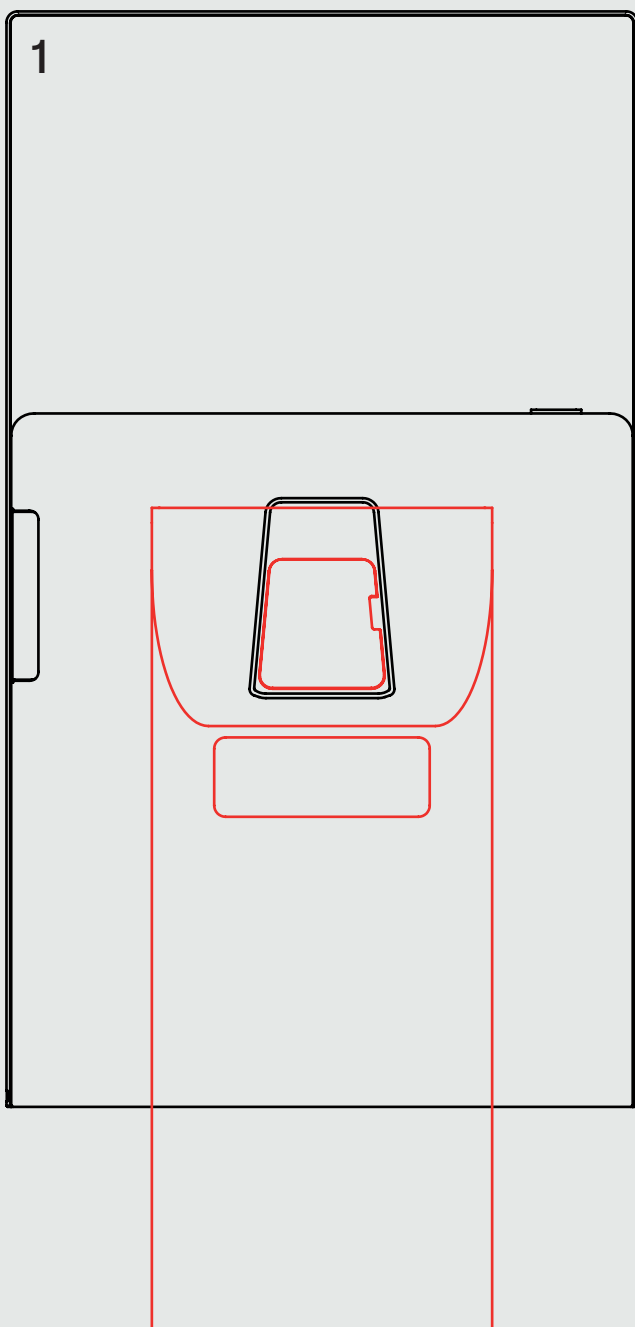

Step 6:

While pressing the side latch button, push the KIOSK01 toward the Floor Stand until the protrusion seats securely in the mount opening.

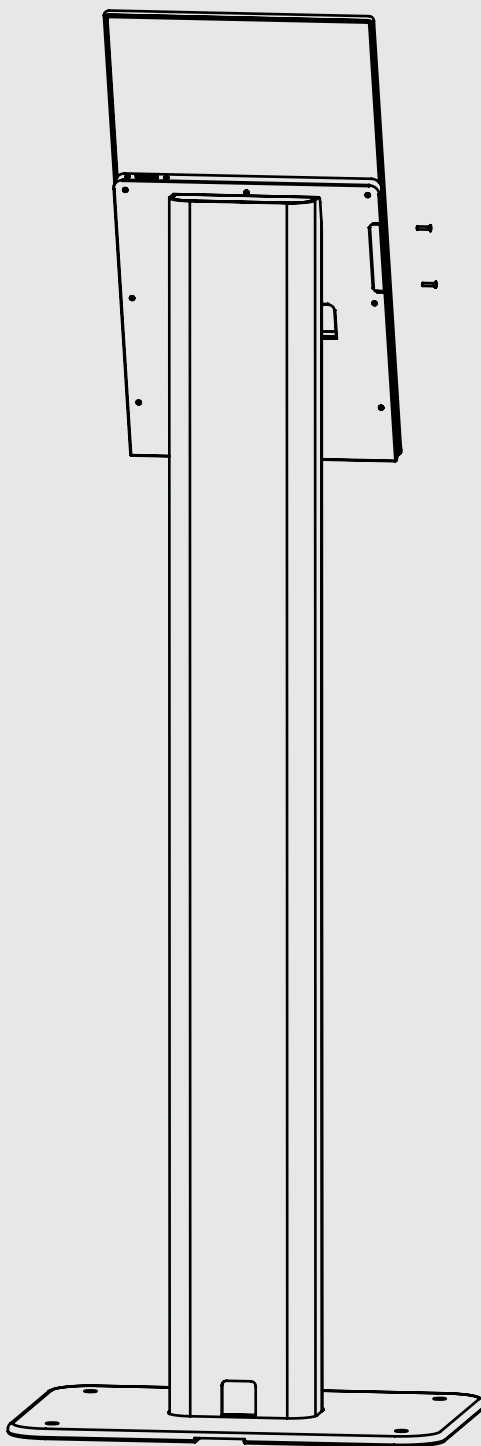

Keeping the KIOSK01 flush against the mount (1), carefully slide it downward until it no longer moves (2). Release the latch button to lock it in place. Make sure the cables are being routed cleanly during this step.

Before letting go of the KIOSK01, gently wiggle it to confirm that it is securely mounted.

Step 7:

Finally, re-fasten the latch cover on the KIOSK01.

Step 8:

If required, use the 4 fastening points in the base to fasten the Floor Stand to any given surface. Refer to page 5 for dimensions.
